

**Australian Parliament
Joint Standing Committee on Migration
Submission no. 364**

I would like to support Mr Sheridan's statements and observations as an Australian .My Family and I are very concerned as todays migrants do not want to embrace our country they wish to use and change and control its direction by ununhealthyhealthy means.Boat people are illegal immigrants who have paid unscrupulous people to get them here and once here they expect to be treated like kings or they cause all sorts of disruptions at our expense. Genuine immigrants have to meet all sorts of rigorous scrutiny before they are allowed in yet these people not only jump the queue but break our laws and we spend our hard earned money looking after them instead of demanding they leave and expecting the countries that enable them to come to deal with this situation. Our hospitals are in crisis ,we have Australians who are in serious situation with no homes because of natural disasters etcetera .and they should be our priority. I also believe that todays moslem invaders are not here to become genuine Aussies but create havoc and try and subversively destroy our way of life.

Regards
