Subject: RE: Inquiry into potential reforms of National Security Legislation

Dear Mr Secretary,

The resources that would be required to fulfill the proposal to retain 2 years of internet use per person would be immense, and totally unacceptable. So far, haven't been justified in any way, as far as I can see.

This requirement would also increase the cost of web use, a thing that the web users of this country would remember. And remember who is responsible.

It is plain ridiculous and another nail in Labor's coffin!

Sincerely,

Janet Taylor
