Parliament House
CANBERRA ACT 2600
AUSTRALIA**

Dear Secretary,

We strongly support any changes to control erection of mobile phone towers and facilities close to homes and close to any place where children will be living or in care.

Please ask the Federal Minister for Communications to review the legal and moral obligations of Carriers in siting and consulting about any proposed towers?

Regulations must

1 restrict how close a tower will be to any school or childcare place or homes?

2 Provide that Proof of safety must be mandatory - G3 technology is 22 times more powerful than the older towers ?

4 studies must prove it is safe to have the relevant type of radiation in the proposed locations?

5 require carriers to ensure no health risks to future generations, from cancers, leukemia and other deadly illnesses.?

David, and RobynHordern
