

To the Honourable Speaker and Members of the House of Representatives,
This petition is of residents of Moe, Newborough and district and draws to the attention of the House that we support improving, renovating and extending the Moe Library and Latrobe City Council Service Centre on their present site. We also support significantly upgrading Moe's transport infrastructure with the provision of an integrated transport interchange in and around Moe railway station.

We further draw to the attention of the House a 2007 petition of residents (attached) from Moe district to Latrobe City Council opposing the relocation of the Moe Library and Council Service Centre and supporting their upgrade on their current site.

We therefore ask the House to oppose the relocation of the Moe Library and Latrobe Council Service Centre to the railway corridor, to support their improvement on their current site, and to support quite separate and much needed improvements to Moe's transport infrastructure.
