

The House of Representatives Standing
Committee on Industry & Resources,
House of Representatives

The Parliament of the Commonwealth of Australia 12-6-
Parliament House
Canberra, ACT, 2600

Dear Sirs,

We are most concerned by the inefficiency of wind towers & having checked global figures & information about wind farms find them alarming in their inadequacy.

The towers will violate our beautiful country which is close to the Siampian mountains. They are destroying our whole community, we are divisional in friendships & family.

In our particular case the Oak Hill Wind farm Glen Thompson, the development has been kept so secret so we have only known about the possibility detail for 4 months. There has been no thought care by the 5 participants & wind company & well being of others.

We are only 2,000 metres from the eastern towers so will have morning flicker & noise the possibility of the power line going in front.

our property, destroying our view of the mountain
& many red gum trees. We are told the
value of our property will decrease so considerable
it is a time of great stress.

It seems incredible that the British Government
subsidizes such an inefficient way of
producing power & would hope that this money
could be spent in more efficient technology
stop the massive development of wind farms
in our area.

Hopefully the Glen Thompson wind farm will
not go ahead.

Yours faithfully

Robin & John Pollard.

(MRS. J. POLLARD.)
