Subject: Kyoto Protocol

Australia is a beautiful country, so why does the government and the power/money orientated people want to make the same mistakes as alot of other countries have already done ie- Japan with its city pollution,the nearly extinct rain forests. How about thinking about a world for our children and their children that they can still enjoy eg-Jogging,Cycling,Fishing,Bird and Animal watching[Uncaged].

I realise we all need to make money and that assets count, but surely there must be a middle line,so please listen to both sides and realise how important the Kyoto Protocol is.
