

**THE HONOURABLE THE SPEAKER AND MEMBERS OF
THE HOUSE OF THE REPRESENTATIVES**

This petition of concerned citizens draws to the attention of the House of Representatives how the health of local communities is being placed at risk because of the existence of species such as flying foxes. We therefore ask the House of Representatives to support the Private Members Bill proposed by Luke Hartsuyker MP which aims to provide emergency powers to the Federal Minister for the Environment to relocate species which pose a risk to public health.
