

SUPPLEMENTARY SUBMISSION 174

The additional information requested was the cost of constructing the link north from Willuna to the Great Northern Highway. The City's preferred option is the "Doolguna Link" option B on the attached plan (from the "Willuna To Great Northern Highway Network and Corridor Review Report" prepared by Main Roads WA February 2006). The total length of this link is 164Km with the first 42 Km to be constructed as part of the Willuna - Meekatharra (Goldfields Highway) link. This leaves 122 Km which Main Roads W A have estimated to cost 48,800,000 to construct to a sealed road standard.

A Map detailing the location of projects listed in our submission is attached.
