

Dear JC-NBN Committee members,

This request is made as per to the terms of reference, Item 1.ii.

---

More details are requested regarding time frames, technology choice, link budgets and cost effectiveness of

1. RF overlay @1550 nm
2. Wimax Band 3 / LTE TDD Band 38 /LTE FDD Band 7 DownLoad/UpLoad rates.
3. (IMT-2000/IMT2000Extn)
4. Interfaces and payloads for OTU1 and OTU2.
5. Satellite link budget.

My interest is in the fastest,direct connection speed (with lowest bit error rate) for a location 22 km (+2km) from CBD Melbourne.

Regards,

D.V.B. Rao
