

To the Federal Member for Föder, Key Elson,

You are asking for submissions on how to minimise future bush fire risks.

Well you know and I know and every body else who is not an environmentalist know why the bush fires are so bad and they will continue to be so with more loss of property and lives unless some thing is done to stop the environmentalists from making the rules and regulations and running this country.

Now you don't have to spend a Million dollars of tax payers money on extra fire fighting equipment and Committees and enquiries that is going to take Nine Months to make a decision.

A simple solution to the bush fire risk is, when there is enough fuel on the ground to burn burn it don't let it build up for years because that is just looking for disaster.

I have just stated the facts I am sorry if I have offended any body.

Yours Truly

L. R. Sparks.
