As a volunteer who handed out how-to-vote cards on election days, I am concerned at the waste of paper and voters feeling harassed. May I suggest that one large poster outside polling area and one small poster inside polling booths, would be a much waste and pollution free way of how to vote.

Harassment is a big issue, society is changing and people will refuse to vote at booths where they are harassed by people jostling to hand out cards. I have had much feed back on this issue. Waste and harassment were the big issues.

A change must be suggested to stop waste pollution and harassment at polling booths.

Thankyou
