Subject: Support for overseas doctors

Dear Sir/ Madam:

I am just one of the many overseas doctors caught in the streamlining of healthcare system in Australia. I've been working in NSW for the past 8 years as an emergency/ intensive care registrar. I ve got my AMC certificate but AHPRA has just sat on my application for general registration for almost 6 months now without any updates at all. How can you even consider this new government agency as the most efficient tool in enhancing healthcare system in Australia.

Dr M. Jacob
