To Whom It May Concern

THE TELECOMMUNICATIONS AMENDMENT (ENHANCING COMMUNITY CONSULTATION) BILL 2011

I would like to voice my support of the above bill. I believe community consultation on the location of telecommunication towers and equipment is vitally important, especially given the 'precautionary approach' recommendation adopted by so many communities already. And by working with the local community, by improved consultation, there is a greater likelihood of all parties gaining a satisfactory outcome.

Should you have wish to contact me in relation to this matter, please call me on .

Yours faithfully

Kristen Elliott
