SUMMARY PAGE

Exchange of Letters constituting an Agreement between the Government of Australia and the Government of New Zealand to Amend Article 3 of the Australia New Zealand Closer Economic Relations Trade Agreement (ANZCERTA) of 28 March 1983

Nature and timing of proposed treaty action

1. It is proposed to bring into force an Agreement to amend (the ‘Amending Agreement’) the Australia New Zealand Closer Economic Relations Trade Agreement (ANZCERTA) of 28 March 1983 [1983] ATS 2. The Amending Agreement will replace the existing text of Article 3 of ANZCERTA relating to Rules of Origin (ROO) and attach a schedule of rules, known as the product specific rules (Annex G). Once all necessary domestic processes have been completed, including amending the *Customs Act 1901* and creating new Regulations for ANZCERTA, the agreement will enter into force on exchange of diplomatic notes. The Amending Treaty is being tabled before the Exchange of Letters with the consent of both parties.

Overview and national interest summary

2. The Amending Agreement will change the method by which Australia and New Zealand determine whether goods imported from the other country meets the ROO requirements and may therefore enter the domestic market duty free. The current ROO approach is based on an assessment of ex-factory cost and the place of manufacture of the goods. The Amending Agreement will change the primary method of ROO assessment to a Change of Tariff Classification (CTC) with the option to use the existing regional value methodology for a five year period. The CTC approach benefits Government and businesses in Australia by:

- . enhancing transparency
- . simplifying the administration of ROO
- . reducing compliance costs
- . enhancing efficiency
- . facilitating increased trade.

Reasons for Australia to take the proposed treaty action

3. Goods that have been “substantially transformed” in either Australia or New Zealand can enter Australia and New Zealand duty free. Substantial transformation is currently defined in ANZCERTA ROO and can be summarised as:

- . the last process of manufacture of the goods must take place in Australia or New Zealand (“last place of manufacture”), and
- . at least 50 per cent of the cost of producing the goods is incurred in Australia or New Zealand (“ex-factory cost”).

4. In its study on the economic and administrative problems of the ANZCERTA ROO, the Productivity Commission concluded the ANZCERTA ROO were outdated and acted as a constraint on further trade. The Productivity Commission determined that the ROO had not kept pace with changes in technology and the organisation of production, which had the effect of reducing efficiency and increasing economic costs.

5. The proposed amendment to Article 3 of ANZCERTA seeks to address these problems identified by the Productivity Commission by changing the primary method of determining ROO to a CTC approach. Under the CTC approach, substantial transformation is demonstrated when goods undergo a specified change in tariff classification which differs from the original classification of their component materials, after production. In a limited number of tariff lines (including vehicles, vehicle parts, men’s suits and structured apparel), a secondary requirement of regional value content will be applied. To facilitate a smooth transition to the CTC approach, the Amending Agreement provides for a grandfathering approach to the ex-factory cost method until 31 December 2011 (or five years from the date of implementation). Until that date, Australia and New Zealand will be obliged to allow imports to enter duty free if the goods meet ROO requirements under either the CTC or ex-factory cost methods.

6. The expected benefits in amending ANZCERTA ROO include:

- . enhancing transparency of Government decisions on whether goods meet ROO requirements for duty free entry by providing a single, clear rule for each tariff line;
- . lowering administration and compliance costs for businesses by eliminating the need for time consuming and detailed calculations to demonstrate the ex-factory costs on the vast majority of goods;
- . improving efficiency by enabling inputs not produced in Australia or New Zealand to be incorporated into goods during manufacture and for those goods still to be able to meet ROO requirements; and
- . facilitating increased trade between Australia and New Zealand by eliminating the disincentive created by current ROO to reduce costs or use higher value imported materials.

7. Adoption of the CTC approach to ROO is consistent with ANZCERTA objectives to enhance opportunities for trans-Tasman trade. It also reflects an increasing global trend towards using this type of ROO, and will improve consistency between Australia’s Free Trade Agreements (FTAs), including the Australia-United States and Thailand-Australia FTAs.

8. Australian industry supports this change to CTC ROO.

Obligations

9. Under the new arrangements, Australia is obliged until 31 December 2011 (or five years from the implementation date) to provide duty free entry to goods if the goods satisfy either the existing ex-factory cost and last place of manufacture approach to determining origin under ANZCERTA (Article 3 (1)(c)(iii)), or the CTC approach (Article 3(1)(c)(i) and Annex G).

10. From 1 January 2012 (or five years from the implementation date), Australia is obliged to provide duty free entry to goods only if the goods satisfy the CTC approach to determining origin under ANZCERTA (Article 3(1)(c)(i) and Annex G).

11. Australia is obliged to adopt processes which implement the CTC approach to ROOS, including adopting rules to allow goods to undergo a specified change in tariff classification after production, which differs from the classification of their component materials, and thereby enter the Australian market duty free. Other obligations under the new approach to ROO include: making provision for an importer to make a claim for preferential treatment based on a declaration by the exporter (Article 3.16); disregarding packaging materials and containers used for shipment when determining whether non-originating materials will undergo a change in tariff classification (Article 3.14); and providing for regional value content (where it relates to certain goods under the Agreement) to be calculated by a prescribed method.

12. Australia is obliged to amend the *Customs Act 1901* and create new Regulations to provide for the change in approach to determining origin under ANZCERTA (outlined in paragraphs 8 and 9 above), including all consequential obligations.

13. Australia is obliged to consult and cooperate with New Zealand to ensure that Article 3 is applied in an effective and uniform manner (Article 3.24).

14. Australia is obliged to consult with New Zealand regularly to discuss necessary amendments to Article 3 and its Annexes (Article 3.25).

15. Australia is obliged to consult with New Zealand on the appropriateness of regional value content set out in Annex G, if New Zealand makes a request in writing (Article 3.26).

16. Australia and New Zealand must complete a review of Article 3 within three years of entry into force (Article 3.27).

Implementation

17. The proposed Amending Agreement will require amendments to the *Customs Act 1901* and creation of new Regulations. There will be no impact on State or Territory laws.

Costs

18. The revised approach simplifies the determination of origin for goods traded between Australia and New Zealand. There are no financial costs to the government, and compliance costs to industry are expected to decrease.

Regulation Impact Statement

19. A Regulation Impact Statement is attached. The Office of Regulation Review has advised that the RIS is 'non-compliant' as it does not include a detailed cost-benefit analysis of the change in compliance costs. A detailed comparison of the compliance costs for each option has not been prepared as these will vary considerably from industry to industry and company to company. In general, however, the compliance costs for the CTC method are estimated to be less expensive. This is because the CTC method does not require the special calculations which confirm that a product meets the ROO under the ex-factory cost method (or related approaches) for determining origin.

Future treaty action

20. The ANZCERTA contains provision for consultation and review of specific provisions, including Articles 3.24 – 3.27 (Rules of Origin) and Article 22 (Consultation and review).

21. The ANZCERTA does not set out any amendment procedures. Any future amendments to the ANZCERTA would require an agreement to be reached between the Australian and New Zealand governments, and would be subject to the Australian treaty process.

Withdrawal or denunciation

22. The proposed treaty action is an amendment of Article 3 of ANZCERTA, which does not include an express reference to the right of Member States to withdraw from, or denounce, the Treaty. Under Article 54 of the Vienna Convention on the Law of Treaties, withdrawal is possible only with the consent of both parties. Such withdrawal would be subject to the Australian treaty process.

Consultation

1. Within the Australian Government, officials from the Department of Foreign Affairs and Trade (DFAT), the Department of Industry, Tourism and Resources (DITR), Department of Agriculture, Forestry and Fisheries (DAFF) and the Australian Customs Service (ACS) discussed the proposal to adopt a Change of Tariff Classification (CTC) approach and the associated schedule. The proposal has also been promoted on the DFAT and DAFF websites and in newspaper advertisements run in *The Australian* and the *Australian Financial Review* on 16 and 22 July 2005 respectively.
2. Australian industry groups were consulted extensively in the development of the proposal and supported it, subject to final consideration of the details in the accompanying schedules. Most parties were satisfied that the proposal resolved a number of issues of concern, involving the treatment of goods obtaining preferential duty without undergoing substantial transformation.
3. The Federal Chamber of Automotive Industries (FCAI) initially argued that there was no strong case for change as its industry had no difficulty with current ANZCERTA ROO and it would not really provide additional consistency as the AUSFTA and TAFTA origin rules were not harmonised. However FCAI requested that, should the CTC approach be adopted, a 50 per cent regional value content (RVC) requirement be imposed. After careful reflection and further consultation Ministers agreed that, consistent with TAFTA, an RVC of 40 per cent should apply to vehicle and vehicle parts under ANZCERTA. New Zealand has no vehicle manufacturing industry and its parts manufacturers are well integrated with the Australian industry.
4. The textile, clothing and footwear (TCF) sector was initially strongly opposed to the proposal to adopt a CTC approach. After further consideration, the footwear and women's wear sectors, represented by the Council of Textile Fashion Industries of Australia (TFIA) and the Footwear Manufacturers Association of Australia, agreed to the proposal and requested that no RVC requirements be imposed. The manufacturers of men's suits were most opposed to a CTC approach, and argued for the sector to be quarantined from any proposal. However, after further consideration, they agreed to a CTC approach, subject to secondary RVC requirements being imposed.
5. The State and Territory governments were consulted through the Standing Committee on Treaties (SCOT). As the treaty amendment does not have any regulatory implications, further consultations with the States and Territories were not required.

**Background information:
Political Brief on New Zealand**

1. New Zealand is a parliamentary democracy in the Westminster tradition. The Prime Minister is the Head of Government and HM Queen Elizabeth II is the Head of State, represented by the Governor-General. Its executive arm of government is drawn from its unicameral legislature, which is elected using a mixed member proportional (MMP) system. The Labour Party, led by Prime Minister Helen Clark, governs in coalition with the Progressive Party and also has confidence and supply agreements with New Zealand First and United Future. The main opposition party is the National Party.

2. Australia's relations with New Zealand are the closest and most broad ranging that we have with any country. Together we bring considerable national assets to the bilateral relationship, including a shared history, similar geography, common democratic values and institutions, significant economic ties, substantial people-to-people links and generally close cooperation in international fora. Nevertheless, we remain two sovereign nations with distinct national interests.

3. New Zealand is a small, open economy with over 4.1 million people. New Zealand is Australia's most important ally in the South Pacific and an important partner beyond. Over many decades, New Zealand has made valuable contributions in areas of high priority to Australia, most recently in the Solomon Islands, Bougainville and East Timor.

4. The Australia New Zealand Closer Economic Relations Trade Agreement (ANZCERTA, also referred to as Closer Economic Relations or CER) which came into effect in 1983, is still one of the world's most comprehensive bilateral free trade agreements, and is now the main instrument governing economic relations between the two countries. In addition, a web of agreements and arrangements negotiated under the umbrella of ANZCERTA support the economic relationship (see attached List of other treaties with New Zealand).

5. Bilateral trade between the two countries has increased at an average of nearly 10 per cent per annum since the inception of ANZCERTA. New Zealand is Australia's fifth-largest trading partner, taking \$9.0 billion of Australian merchandise exports in 2005. Australia is New Zealand's largest trading partner, providing 23 per cent of its merchandise imports and taking 21 per cent of its exports. Total bilateral merchandise trade came to \$14.4 billion in 2005. In 2005, trade in services was valued at \$4.7 billion and bilateral investment stood at \$61.8 billion.

6. In addition to CER, both governments are progressing a range of initiatives to enhance trans-Tasman business integration, streamline border processing arrangements, and work towards a Single Economic Market (SEM) based on common regulatory frameworks.

7. The trans-Tasman relationship will necessarily evolve as differences in economic strength, political systems, ethnic composition and strategic outlook become more apparent. Australia has a strong and direct interest in a dynamic relationship with an outward-looking and economically strong New Zealand.

			<p>1. Chemical Reaction Origin Rule Any good of Chapters 28 through 38, except a good of heading 3823, that is the product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in the territory of the Parties. Notwithstanding any of the line-by-line rules, the "chemical reaction" rule may be applied to any good classified in the above chapters. Note: For purposes of this section, a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of the molecule. The following are not considered to be chemical reactions for the purposes of determining whether a product is an originating good: (a) dissolving in water or other solvents; (b) the elimination of solvents including solvent water; or (c) the addition or elimination of water of crystallization. Notwithstanding any of the line-by-line rules, the "chemical reaction" rule may be applied to any good classified in the ab</p>
			<p>2. Purification Origin Rule For the purposes of Chapters 28 through 35 and Chapter 38, purification is considered to be origin conferring provided that one of the following criteria is satisfied: a) purification of a good resulting in the elimination of 80 percent based of the content of existing impurities; or b) the reduction or elimination of impurities resulting in a good suitable for one or more of the following applications: (i) pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances; (ii) chemical products and reagents for analytical, diagnostic or laboratory uses; (iii) elements and components for use in micro-elements; (iv) specialized optical uses; (v) non toxic uses for health and safety; (vi) biotechnical use; (vii) carriers used in a separation process; or (viii) nuclear grade uses.</p>

Mixtures and Blends Origin Rule For the purposes of Chapters Chapter 30 and 31, heading 3302, subheading 3502.20, headings 3506 through 3507 and heading 3707, the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials is considered to be origin conferring.</p>
			<p>4. Change in Particle Size Origin Rule For the purposes of Chapters 30 and 31: a) the deliberate and controlled reduction in particle size of a good, other than by merely crushing (or pressing) resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials is considered to be origin conferring; or b) the deliberate and controlled modification in particle size of a good, other than by merely pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials is considered to be origin conferring.</p>
			<p>5. Standards Materials Origin Rule For the purposes of Chapters 28 through 32, Chapter 35 and Chapter 38, the production of standards materials is considered to be origin conferring. For the purposes of this rule "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses having precise degrees of purity or proportions which are certified by the manufacturer.</p>

			<p><u>1. Chemical Reaction Origin Rule</u> Any good of Chapters 39 through 40 that is the product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in New Zealand or Australia. Notwithstanding any of the line-by-line rules, the "chemical reaction" rule may be applied to any good classified in Chapters 39 through 40. <u>Note:</u> For purposes of this section, a "chemical reaction" a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for the purposes of determining whether a product is an originating good: (a) dissolving in water or other solvents; (b) the elimination of solvents including solvent water; or (c) the addition or elimination of water of crystallization.
