ANSWER TO QUESTIONS ON NOTICE
Infrastructure and Transport

Division/Agency: Surface Transport Policy - Maritime Policy Reform
Topic: Amendments to Annex III of MARPOL
Hansard Page/s: TR 3

Senator Lisa SINGH asked:

Senator SINGH—What are the chemicals that are carried on ships?

Mr Nelson—Chemicals are categorised according to categories X, Y and Z, with X being the most hazardous. I can certainly take the question on notice to provide you with a list of the chemicals listed as category X chemicals. They are obviously the ones that have been assessed and are the most damaging to the marine environment.

Senator SINGH—Thank you. Does oil fit into category X?

Mr Nelson: No

Answer:

Chemicals carried in bulk by ships are categorised as ‘X’, ‘Y’, ‘Z’ or ‘other’. Category ‘X’ substances are the most environmentally hazardous and, if discharged into the sea from tank cleaning or deballasting operations, are deemed to present a major hazard to either marine resources or human health and, therefore, justify the prohibition of the discharge into the marine environment.

The substances currently classified as ‘X’ are listed in Annexes 1, 2 and 3 of the attached document MEPC.2/17, and can be identified by an ‘X’ in the column headed ‘CAT’.

Senator Dean SMITH asked:

Senator SMITH—If the ship loses its cargo at sea, is that regarded as pollution irrespective of the nature of the cargo?

Mr Nelson—Yes.

Senator SMITH—Is that information recorded anywhere?

Mr Nelson—Yes – there is an obligation on the ship to report. Whether it is oil, chemical or a container they are legally obliged to report to the nearest coastal state. We receive reports through our Rescue Coordination Centre in Canberra. We have a database in which we record the reports we receive. Obviously if it is something that can be responded to, such as oil spill, the country will consider what to do in response to the incident.

Senator SMITH—How prevalent is it that a ship loses its cargo in Australian waters? Are we seeing an increasing trend or a declining trend?

Mr Nelson—I would have to take that on notice. You are talking about, potentially, lost containers?

Senator SMITH—Yes.

Answer:

AMSA's Rescue Co-ordination Centre (RCC) does occasionally receive reports of containers lost at sea. When such reports are received, the RCC will typically broadcast a warning to shipping in the area. AMSA does not, however, record or analyse any data on such warnings when issued with regards to lost containers. Anecdotal evidence, however, indicates that there has been no noticeable increase in the number of lost containers being reported to the RCC.

17 December 2011

PROVISIONAL CATEGORIZATION OF LIQUID SUBSTANCES

1 Introduction

1.1 This circular is issued in accordance with regulation 6.3 of MARPOL Annex II, replacing all previously issued circulars under this title.

2 Lists of annexes

2.1 Annexes 1 to 4 provide lists of noxious liquid substances (NLS) with associated categories and minimum carriage requirements which have been established through Tripartite Agreements and registered with the Secretariat in accordance with the regulation referred to above. Annexes 5 to 8 and 11 are intended to facilitate the reporting of Tripartite Agreements and the interpretation of abbreviations used in annexes 1 to 4.

- annex 1:** List 1: Pure or technically pure products;
- annex 2:** List 2: Pollutant only mixtures containing at least 99% by weight of components already assessed by IMO;
- annex 3:** List 3: (Trade-named) mixtures containing at least 99% by weight of components already assessed by IMO, presenting safety hazards;
- annex 4:** List 4: Pollutant only mixtures containing one or more components, forming more than 1% by weight of the mixture, which have not yet been assessed by IMO;
- annex 5:** List 5: Substances not shipped in pure form but as components in mixtures;
- annex 6:** Synonyms for vegetable oils;
- annex 7:** Country abbreviations;
- annex 8:** Tripartite contact addresses;
- annex 9:** Manufacturers authorized to conduct pollutant-only assessments by calculation;
- annex 10:** Cleaning additives; and
- annex 11:** Bio-fuels recognized under the 2011 Guidelines for the carriage of blends of petroleum oil and bio-fuels.

3 Observations related to the annexes

3.1 Language

3.1.1 As seen in the lists, most products are trade-named substances shipped under n.o.s. entries. Since trade-names are not translated, the products are entered as notified and the lists are issued in English only.

3.2 Shading

3.2.1 **Amendments** made to the Product Lists (annexes 1 to 5) relative to the previous circular are identified by shading in the field in which a change has been made.

3.3 List 1: Pure or technically pure products (annex 1)

3.3.1 List 1 entries retained for this circular comprise of the following elements:

- all tripartite entries showing an expiry date (including new notifications received throughout the past year; and
- entries having "all countries/no expiry date" but which were either finalized after adoption of the 2009 amendments to the IBC Code or were included in the 2009 amendments of the IBC Code but for which changes have subsequently been agreed as reflected in their List 1 profiles.

3.3.2 Included in the latter category, new data on electrical equipment (columns i', i" and i''') for a number of products listed in chapter 17 of the IBC Code (where this information has previously been missing) are also now incorporated into List 1. These entries, as agreed at BLG 15, are based on the listing set out in annex 6 of BLG 15/WP.3 and, in these cases, it should be noted that only the information presented for column i has been shaded in order to highlight these products.

3.3.3 Further additions to List 1 have also been introduced reflecting the five bio-fuel blends and their carriage requirements as set out in MEPC.1/Circ.761. Shipment of these specific blends is now valid for all countries and with no expiry date.

3.3.4 For **products marked (*)**, this indicates that with reference to chapter 21 of the IBC Code (paragraph 21.1.3), deviations from the normal assignment criteria used for some carriage requirements have been implemented. Currently, this is applicable only to Ammonium chloride solution (less than 25%), Cesium formate solution and Sodium bromide solution (less than 50%).

3.4 List 2 and List 4: Pollutant only mixtures containing at least 99% by weight of components already assessed by IMO (annex 2) and Pollutant only mixtures containing one or more components, forming more than 1% by weight of the mixture, which have not yet been assessed by IMO (annex 4)

3.4.1 For Lists 2 and 4, it should be noted that a small number of products have been deleted relative to the entries shown in MEPC.2/Circ.16 based on either a reassignment of these products to List 3 (having identified new safety concerns) or a decision to withdraw these products for shipment purposes.

3.5 List 3: (Trade-named) mixtures containing at least 99% by weight of components already assessed by IMO, presenting safety hazards

3.5.1 Similarly, for List 3, it should be noted that there have been a few deletions relative to the entries noted in MEPC.2/Circ.16 based on either a reassignment to List 2 or a decision not to submit tripartite agreements reaching their expiry date for evaluation.

3.6 Country and Territory Codes (annex 7)

3.6.1 The list of country and territory abbreviations mirrors that used in the Global Integrated Shipping Information System (GISIS), which is based on the UN/Locode, a geographic code scheme, developed and maintained by the UNECE, a Unit of the United Nations. These codes are listed in annex 7: Part 1 of the annex presents entries by Code order whilst Part 2 gives a listing by Country/Territory order.

3.7 Cleaning additives (annex 10)

3.7.1 MARPOL Annex II regulations for the discharge of Noxious Liquid Substances, include restrictions on the types of cleaning additives allowed to be used in tank washing operations as follows:

"13.5.2 When small amounts of cleaning additives (detergent products) are added to water in order to facilitate tank washing, no additives containing pollution category X components shall be used except those components that are readily biodegradable and present in a total concentration of less than 10%. No restrictions additional to those applicable to the tank due to the previous cargo should apply."

3.7.2 All cleaning additives evaluated by the BLG Working Group on the Evaluation of Safety and Pollution Hazards of Chemicals (ESPH) and found to meet the requirements of paragraph 13.5.2 of the MARPOL Annex II are consolidated into annex 10 of the MEPC.2/Circular.

3.7.3 In line with the decision taken by the Marine Environment Protection Committee at its fifty-sixth session, cargo tank cleaning additives which were submitted before 1 January 2007 and were evaluated through MEPC/Circ.363 have ceased to be valid. Accordingly, all cargo tank cleaning additives presented in annex 10 as meeting the requirements of regulation 13.5.2 of MARPOL Annex II have been evaluated in accordance with the revised guidelines as set out in MEPC.1/Circ.590.

3.7.4 In order to facilitate any future liaison with additive producers that may be required, a record of the Administrations having submitted cleaning additives on behalf of the manufacturers is included for all product entries to annex 10.

3.8 Blends of petroleum oil and bio-fuels

3.8.1 As agreed at BLG 15, a new annex has been introduced into the MEPC.2/Circular to record all bio-fuels approved for bio-fuel/petroleum oil blends as covered by the 2011 Guidelines for the Carriage of Blends of Petroleum Oil and Bio-fuels which are set out in MEPC.1/Circ.761. Annex 11 accordingly lists the five bio-fuel products which are currently recognized under these Guidelines.

4 Notification of new entries

4.1 Guidelines for the provisional assessment of liquids transported in bulk are set out in MEPC.1/Circ.512. When notifying the Secretariat of any provisional assessment made under Tripartite Agreement, Administrations are requested to:

- .1 **specify whether in List 1, 2, 3 or 4; and**
- .2 **provide all relevant data to be included in the circular.**

4.2 As the majority of products notified are classified by the calculation method and are candidates for List 2, it is particularly important to provide the information to IMO in a format that will facilitate efficient and accurate transfer to the database used to generate the various lists included in this circular.

4.3 For hard copies with **candidates for List 2**, the preferred method is to notify **one product per page in the following format:**

Reporting Country	:
Manufacturer	:
Tradename	:
List Number	:
Contains Name	:
Pollution Category	(Cat) :
Ship Type	(ST) :
n.o.s. Number	:
Melting Point (°C)	(Mpt) :
Flash Point (c.c., °C)	(Fpt) :
Viscosity @ 20°C (mPa.s)	(V ₂₀) :

Note: Incomplete data on a substance will result in the submission being delayed while the application is returned to the originator for further review.

4.4 For products being notified as **candidates for List 1, 3 or 4**, the format shown in appendix 3 of the annex to MEPC.1/Circ.512 is preferred.

4.5 While stressing the importance of correct data being supplied to the Secretariat, it should be noted in particular that, when proposing a product for Lists 2 and 4, the component responsible for the greatest pollution potential should be specified following the word "Contains" in the Shipping Name. Such a component is that with the highest value obtained from the calculation of % x component factor. In the event of there being more than one component with equivalent highest scores, discretion may be used in deciding whether one or both components should be identified (see MEPC.1/Circ.512). The name used for the component(s) should be one of those appearing in chapter 17 or 18 of the IBC Code or those in List 1 or 5 of this circular as available.

4.6 It should also be pointed out that any cargo offered for bulk shipment shall be indicated in the shipping document by the product name under which it is listed in chapter 17 or 18 of the IBC Code or the latest edition of the MEPC.2/Circular or under which it has been provisionally assessed. In this respect, special attention should be given to BLG.1/Circ.17 regarding the use of the proper shipping name in offering bulk liquid cargoes for shipment and to BLG.1/Circ.25

which deals with the use of specific product names in preference to generic entries when both options are available to describe a bulk liquid cargo.

4.7 When shipping a pollution hazard only mixture, the appropriate n.o.s. entry in the IBC Code, together with the tradename and "product contains" information, would form the proper shipping name. For example, if the trade name is IMO 1234 and it contains "Calcium long-chain alkyl salicylate (C13+)" as the component with the greatest pollution potential, then the correct product name could be:

Noxious liquid, N.F., (5) n.o.s. (IMO 1234 contains Calcium long-chain alkyl salicylate (C13+)) S.T. 2, Cat. Y

4.8 The Master of a type 2 ship certified to carry n.o.s. (5) products would then know that he can accept the cargo without concern as to fire, toxicity and other safety hazards and that, in the event of an accidental spill, he could report the name of the substance responsible for the pollution to the coastal State authorities.

5 Tripartite contact addresses

5.1 In accordance with the MEPC resolution on Tripartite Agreements, resolution MEPC.109(49), Administrations are requested to note that contact points which have not informed the Organization of their **latest** contact details should be deemed to have accepted the Tripartite Agreements whilst other contact points should still follow regulation 6.3 of MARPOL Annex II.

5.2 It would, therefore, be appreciated if Administrations could verify that information included in annex 8 of this circular is correct and supply any useful additional information, for example, e-mail addresses, as appropriate. As the Secretariat has only been supplied with the addresses listed, those Administrations which have not supplied any focal point address are requested to do so. **In this respect, it should be noted that the tripartite agreement contact points are now available through the GISIS database and that any amendments required may be effected directly by the Administration concerned.**

LIST 5: SUBSTANCES NOT SHIPPED IN PURE FORM BUT AS COMPONENTS IN MIXTURES

Product Name	Relevant columns of the GESAMP Hazard Profile						Ship Type
	A1	A2	B1	B2*	D3	E2

* BLG 6 had agreed that, in the absence of measured chronic toxicity data, surrogate data using the GHS system to estimate missing chronic aquatic toxicity data could be used and that the estimation of chronic toxicity would be determined as shown below:

1. if, in the GESAMP Hazard Profile, Col B2 is 'NI' or Col A1 is 'NI' or Col A2 is 'NI', then there are not enough data to apply the OECD criteria, and therefore the product is deemed to be chronically toxic to aquatic organisms; but
2. if the aquatic LC50 is <100mg/l (Col B1 is 2, 3, 4, 5 or 6); and the product is Not Readily Biodegradable (Col A2 is 'NR') or the product is bio-accumulated (Col A1 is 4, 5 or 6), then the product is deemed to have a chronic toxicity of <1mg/l which is equivalent to a '1' in column B2; otherwise
3. the product is deemed not to be chronically toxic.
