

People who come to Broome who love it come here for the lifestyle. It's unique, it is not a mining based profile of itinerants - its a holiday visitors who love it a come back.

STMT.

FIFO will bring about loss of community.

- ①. Broome is an Australian iconic destination along with the wilderness of the Kimberley.

A Holiday Broome's demographic has ~~be~~ constituted floral shirts not flouro's. Thongs, not steel caps. Other towns facing FIFO associated effects are not tourism based.

FIFO industry does not support community. Families consisting of Mothers, children and fathers do not get involved in community here in Broome. The money spent and the people that consolidate a community aren't here, and neither is their money to support business or community.

An example of another community Pt Hedland has just started building its 3rd Rec/Sports centre. They are unvisited mostly as FIFO are provided with these services at no cost at their camps - Along with not going to restaurants, buying clothes, paying rates etc

How far does the FIFO arm reach. Are the people distinctly (resident Aust) or also international workers. ~~Is~~ If so they are not even community building in Aust. The money is leaving the

FIFO. How far does FIFO reach - Are the people even distinctly Aust or will they be international

2-3 Sporting Rec facilities <sup>money leaves Aust.</sup> being built unnecessarily as the workforce of mining companies are supplied - food - clothes - accommodation - gyms - etc.

The Demographics of the town - Flouros shirts  
Holiday destination. Not Flowered shirts.  
Flouros, keeping cars.

Families - Community - No money into  
local footy,

FIFO for essential services is exactly that essential.

FIFO for oil + gas is not essential as an already bought gas industry in the pipeline exists & sustains a worldwide demand to export.

- Suggest as a solution to FIFO associated problems - Do not pay travel allowance & make them pay for accommodation → build local community.

It's not an environment - I wish to export my children to and they will not be able to afford, having great or anything else as prices increase, which will happen dramatically.

FIFO - There is already existing problematic issues that happen due to FIFO in the town, staff accommodation out of town they are still not part of the community. would never inject resources into the town if they did.

Even if the big mining companies help by providing prices in general because they can. business! it means less time spent for locals & higher prices in general because they can.  
Business - being approached to be helped by outsiders!
