Subject: Submission for Privacy Bill Tabled on 12 April 2000

I am concerned that the above bill is a soft touch not a light touch.

Data mining is an invasion on privacy. Individuals' privacy is not the business of Government unless permission of each individual is obtained.

Australia is a democracy and as such is governed by the people. Why is this bill slipping through Parliament with such haste?

I charge this Government to more accountability and transparency to the Australian public.
