December 16 2006

The Secretary
Public Works Committee
Parliament House
CANBERRA ACT 2600

Dear Sir

re Redevelopment Defence force
- Signals Simpson Barracks Watsonia

In reply to request for comments as advertised in today's edition of 'The Australian' newspaper I advise I am writing in support of this project as I have been involved in open forums conducted in local electorates in 1998 discussing merits of the privatisation of TELSTRA

My initial reaction to panels comprising staff from TELSTRA as representing Liberal Party & local identities from our community was made to believe defence force tactics did not warrant support against the proposed sale and as the Iraq War had not figured nor started the subject of Australian communications was glossed over.

As I know that defence is a well established area is important where growth or population is being infiltrated with ethnic background I must insist development go ahead for Army defence reasons

Yours Very Truly
