Date Received: .....	10/1/11
Secretary: .....	Sc

RECEIVED  
10 JAN 2011

Dear Mr James

**THE MURRAY DARLING BASIN and THE RIVERS' MESSES!**

Your letter dated 17 November 2010, received and read, 23 December 2010, is acknowledged. In the second last paragraph, you state, "I would encourage you to participate in these opportunities for input to the Basin Plan". I take you at your words, and accept your invitation.

In paragraph two you typed, "There are enormous challenges facing reform in the Murray-Darling Basin". **It isn't the Murray-Darling Basin** that requires reform! **It is the people and politicians, the farmers and irrigators** of Australia [who rely on water from the Basin], **who require reform!**

"For generations"! If you *and* politicians *and* people, especially Murray River Water farmers *and* irrigators only know and understand what relevance *and* significance the word "generations" has to the **ME\$\$** in the Murray Darling Rivers, you would then comprehend **why** The Basin is in a **ME\$\$!**

"over allocation of water resources" are the words of people, such as you, and tv reporters, who don't know what they are saying. It's the *catch phrase* of the moment. So, let's *all* run with it! As I type this letter, much of rural and provincial Victoria has been *flooded!* Maybe this is a real example of "over allocation of water resources"! According to tv news here in Victoria, most of Queensland is being *flooded out!* Maybe this is an example of "over allocation of water resources"!

"The health of the Basin reach a critical point" **isn't caused by** "over allocation of water"! Right now you won't understand what I have typed, that you have just read. *This guy must be nuts!*

"During the drought"! Attached to this letter, is a document, with attachments, prepared for the ABC tv LANDLINE program. The **cause** for the **drought** is revealed in that document. Whether the reporters and producers at LANDLINE decide to do anything with the material, time alone will tell.

"algal blooms and acid sulphate soils" are the manifestations of a much deeper seeded problem. And, "over allocation" **isn't the root causes** for *blooms and acid sulphates* in the soils. This **ME\$\$** can be reversed *and* the Basin restored, when **people** make mandatory *reform* changes required.

"for food production". In the LANDLINE document, you will read about **"real wake-up call"**! Once you have reached this part, and read it, you may then begin to know **why** The Basin is in a **ME\$\$!**

Paragraph three is probably the most important part of your letter to me. **"The way we have been .....** **is not working to support the long-term viability of rivers or rural communities"**. What [most] people of Australia, especially those irrigator farmers, have been doing, isn't working, to their financial gain *and* long term sustainability. It is working to their psychological, mental, emotional, financial, *and* spiritual destruction *and* non-sustainability. TRUTH sets people FREE!

"We need a healthy river" **This isn't going to happen!** Not with **"business as usual"**!

"strong regional communities" and "sustainable food production"!

Part of this is addressed in the LANDLINE document. The solutions are not covered or revealed. It's not that I can't cover them. It's that I won't reveal them! The reasons are in the LANDLINE doc.

"reform is still required to provide a lasting solution"!

Reform is of the *human* kind, not of the *basin* kind! With all the rain that has flooded Victoria, rural and provincial New South Wales, and most of Queensland, **why** couldn't these floods' waters have been **washed down the Murray Darling to flush out the algal blooms and acid sulphates?**

The "a lasting solution" is found in "a real wake-up call" in the LANDLINE document.

Paragraph four, "to develop a whole of Basin plan"!

This should read "to develop a whole of people plan"! This is covered in the LANDLINE doc.

Paragraph five: "The government is already investing more than \$12 billion in the 'Water for the Future' program".

"This initiative is helping communities adjust to a future with less water"

**With less water** is an argumentative debate you wouldn't win with the farmers of Queensland, New South Wales, and Victoria, who have **with too much water** situations (**floods**) to deal with!

Many of the people of Queensland, New South Wales and Victoria, have a **too much mud in our houses and business premises** to deal with, as I type this letter. Mud is the aftermath of **too much floods' waters** that carried with them, **a whole lot of dirt**, and left the residue, called **mud!**

There couldn't have been any **residue mud**, unless there had been **too much water**, could there?

'bridge the gap'. How do politicians, i.e. the government, intend to accomplish this? With money!

Politicians and Murray River irrigator farmers have no knowledge of ..... "due season rain"!  
If they did, they would understand how to **"Fix The ME\$\$ in The Murray"!**

Paragraph six: "The final Plan must be signed off by the Minister"!

Maybe within the next twelve months the responsible ministers (noun) can minister (verb) the **cures** and **sustainable solutions** to The ME\$\$ in The Murray?

But this won't happen!

Not using the same paradigm of ignorance, from which The Murray Basin ME\$\$ was created!  
Politicians have \$12 billion cures to this ME\$\$! After all, cash is king, and the panacea, isn't it?

Paragraph seven: "sixteen weeks will commence, during which time public submissions will be sought". You should file this document, for when that public submission time comes around.

Paragraph eight: "are not passed to future generations with increasing severity"!

Farmers and irrigators are already experiencing this **future generations increasing severity!**  
**This will get worse!** They, politicians, and you, **don't know or understand the root causes!**  
**And, until people know and understand the root causes for the ME\$\$, the cures can't commence!**

*Knowing and Understanding Cancers' Root Causes!*

*Healing and Curing and Teaching, Diseases Cures!*

"I [God] will cause the [cancer curses] person to ask for your help in the time of evil and in the time of (their diseases) affliction." [Jeremiah 15: 11]

"He [the Lord Jesus Christ] heals the broken-hearted and binds up their wounds [curing their pains and their sorrows]." [Psalm 147: 03]

"Then satan answered the Lord, Yes, all that a man has will he give to save his life [from a cancer death]." [Job 2: 4]

Yours faithfully

Graham McDonald

COPY

Dear Mr McDonald

I refer to your letter of 11 October 2010 copied to the Minister for Sustainability, Environment, Water, Population and Communities, the Hon Tony Burke MP, concerning the Guide to the proposed Basin Plan (the Guide). The Minister has asked me to thank you for your letter and reply on his behalf.

There are enormous challenges facing reform in the Murray-Darling Basin. For generations, poor management of environmental assets and over allocation of water resources have seen the health of the Basin reach a critical point. During the drought, algal blooms and acid sulphate soils made parts of the river unusable for food production.

The way we have been sharing water in the Murray-Darling Basin is not working to support the long-term viability of rivers or rural communities. We need a healthy river, strong regional communities and sustainable food production. Recent rains have provided some relief, however reform is still required to provide a lasting solution.

The Murray-Darling Basin Authority (the Authority) is an independent authority, established to develop a whole of Basin plan. The Guide is not final and it is not government policy. The release of the Guide is an early opportunity for consultation and community engagement. It will inform the drafting of the proposed Basin Plan. The Authority is also undertaking more studies on the local and community impacts of the proposed Basin Plan.

The Australian Government has announced a Parliamentary Inquiry into the socio-economic impacts of the proposed Basin Plan. The Government is already investing more than \$12 billion in the 'Water for the Future' program - providing funding to improve rural water infrastructure, on and off farm and in Basin towns. This initiative is helping communities adjust to a future with less water. Further information on these programs is available at: [www.environment.gov.au/water](http://www.environment.gov.au/water). The Government has also announced it will 'bridge the gap' between current levels of water use and those to be permitted under the Basin Plan.

There are 12 months of consultation before the Minister for Sustainability, Environment, Water, Population and Communities is presented with the Plan. The final Plan must be signed off by the Minister.

Mr Lawrie Arthur  
 Water Taskforce Chairman  
 National Farmers' Federation  
 P O Box 36  
 Moulamein NSW 2733

Dear Lawrie Arthur

**MURRAY DARLING BASIN and THE RIVERS' MESSES!**

When I called your mobile today, you courteously asked me: "What can I do for you?"

You can't do anything for me, where rain waters for the Murray and Darling Rivers are concerned. I, on the other hand, can do much for you and the farmers of Australia, who are relying solely on these two major rivers, for their supply allocation of water, to meet their farming financial needs.

TV quotes that caught my attention are: **WE CAN'T GO ON AS WE ARE!**

Whoever spoke these words of wisdom is truly a person of insight.

A simple definition for **insanity** is: *To continue doing what we've been doing, that have brought us the results we don't want, and continue doing these same things, expecting our results to change!*

If you read and remember nothing else from this letter and attachments, read and remember this:

▶ **FOR MY RESULTS TO CHANGE, FIRST (1<sup>ST</sup>) I MUST CHANGE!**

MY and I are generic words for the general (farming) population of Australia.

TV quotes that caught my attention are: **OVER ALLOCATION!**

I hope you don't mind straight talk truth. Most people in the media, including and especially TV reporters and journalists, only appear on camera and speak, to enunciate their **ignorance and stupidity** to the few people in Australia, who actually know what we write about *and* teach.

I am not a news reporter or TV journalist. I am in this minority who knows what I type *and* teach.

Why would any intelligent farmer of right, sane, sound mind, rely exclusively on water from the Murray or Darling or any other Rivers for this matter, when they could have [due season] rain over their farm lands, coming just at the right time, when needed? Allow me to elaborate here. Australia has been dried out, by **drought**. Other parts of Australia, including south east QLD, and my own state of Victoria, have been recently drowned out, by **floods**. Other parts of Australia, especially the cropping areas, are receiving undue seasonal rain that is spoiling the crops for harvest.

In some places the ground is too wet to put the headers across the crops. And any would have been *quality grain seed for next year's crops*, is no longer quality grain seed for next year's crops, but now livestock feed. Am I on the money with what is happening across farms' lands Australia?

TV quotes that caught my attention are: **WE HAVE \$9 BILLION TO SOLVE THIS PROBLEM!** I am a willing and ready recipient to this generous offer from, I believe it was, a federal government politician, such as Tony Burke, or maybe this statement came from Mike Taylor, chairman of the Murray / Darling Basin Authority. Right now, I could use \$Billions for the works of my institute.

I find this statement typical of all politicians and “*experts*” who are in ignorance. When all else fails, let’s continue to do what we’ve always done, and throw money at the mess. I’ll have some of this mess money, thank you very much! There’s one major problem with throwing money at the mess! **WHEN “WE” DON’T UNDERSTAND THIS CAUSE! THEN “WE” CAN’T CURE THIS PROBLEM!**

Is “money” going to cause rain to fall into these major rivers? I don’t believe it will. When all *willing water sellers* have had their water allocations purchased by the fed government, where to next? Especially if the Murray and Darling rivers are not receiving rain to replenish their supply! Should all available water dry out from these rivers, what next? Let’s buy some rain! This theory is good in principle. But from where and from whom do you *buy this rain*? The politicians don’t have any to sell! But they have taxes payers’ money to throw at any mess!

### **LETS MAKE NW WA and NW TAS THE FOOD GROWING AREAS OF AUSTRALIA!**

I don’t recall who announced these ideas to the people of Australia. But the obvious attraction is the apparent supply of rain and water to these areas. But has anybody bothered to stop and think that just as most of Australia has been dried out and parts of Australia have been drowned out, that The One Who has ultimate control of the *rains tap* can very easily turn it off, over these areas. In many parts of Tasmania, farmers would like the tap turned off, so the land can dry out a little.

From what I see on LANDLINE there are a *whole lot of farmers in a whole heap of mess and hurt!* I watched the program where you were filmed flying your helicopter across WA rice crop land. But what is happening in your own back yard of Moulamein and your state of NSW? The following is a rhetorical question: “*Are you farming for net profit? Or, are you carrying a whole heap of debt?*”

### **DO FARMERS WANT RAIN IN THE RIVERS? And ACROSS THEIR FARMS’ LANDS?**

Don’t look to politicians to provide the rain water solutions. Why do I make this statement? “We” have gone from Penny *goddess* Wong to Tony *god* Burke. The *new* politician in the *old* portfolio! Surely, Tony Burke can solve the Murray Darling Basin mess, can’t he? If he can, why hasn’t he? “*Cursed with great evil is the (farmer) man who puts his (reliance and) trust in (politician) man!*” I will leave you to determine where the *italics* sentence above comes from. *The rain tap owner?*

### **DO FARMER\$ WANT \$OLUTION\$ TO THEIR FINANCE\$ and PERSONAL ME\$\$E\$?**

*Oh, the sweet patter of gently cascading rain drops on the roof top, and delight in watching the rain fall onto the front and rear lawns, and its provision of nurturing moisture to the flowers in the beds.* This sounds very poetic, doesn’t it? This is what is happening in metropolitan Melbourne as I type the words of this letter. *Do farmers who rely on the Murray Darling Rivers need rain? Do you?*

*Obviously, Rivers Murray and Darling are not yet in bad enough condition, for the farmers who are reliant on allocations from these rivers, to investigate alternatives (solutions and cures) to a mess farmers (people) have created for themselves! You are saying, “We have created our own mess! We have to accept responsibility for the rivers basin rainless mess, now affecting us financially?”*

**NO CAUSE\$ KNOWLEDGE & NO REAL TRUTH UNDERSTANDING = “OUR” ME\$\$ REMAINS!**

I know absolutely, *causes* for cancer! I know absolutely, *curses on farmers and people and the rainless rivers mess!* *If farmers want, positive, actionable, reverse “our” mess solutions, call me.*

Yours faithfully

Dwight L Moody said, "When a man *thinks* he has got a good deal of strength, and is *self-confident*, you can *look for his downfall*. It may be years before it comes to light, but it has already commenced." This quote is from Our Daily Bread, 8 December 2010. If you don't know anything about D. L. Moody, do an internet search, or contact your local library for enlightenment. His quote is very relevant to the *self-confident* politicians of Australia, who *guide* the people through *legislated laws*, and to the *self-confident farmers* of Australia, who are now reaping a harvest from crops of *self-confident* seeds sown over many years, and to the *self-confident* presidents and ceo's of Australia's farmers' federations. If these people have the *self-confident* answers and solutions, ***why are Australia's farmers in a ME\$\$\$!***

As I watch ABC news reports, and The Best of LANDLINE, it appears to me that most **farmers** of Australia are lurching from disaster to disaster, especially debts disaster! *One good year, supposedly, will get them out from under their increasing overdrafts and debts mess in which they find themselves.* And **farmers** are looking to *politicians and governments* to extricate them from their (debts) messes!

How can Tony Burke, as the Commonwealth representative politician and any other States and Territories politicians help the **farmers** of the Commonwealth, States and Territories to solve their farms' debts messes, when the politicians can't help themselves, to solve their own problems in life? These *self-confident* people should say to themselves: "Oh Lord God, *what am I doing wrong?*"

Speak not in the ears of *a self-confident fool*, for he will despise the [godly] Wisdom of your words." [Proverbs 23: 9 Amp]. Are the words on these pages falling into the eyes of a *self-confident female*, or, into the mind and heart of an astute and alert and very aware woman, who is also a lady? Is yours a genuine interest to help Australia's **farmers**, get out of the (*money*) messes that are destroying them?

## 1 "Mother Nature" and Drought and Floods:

The Word of the Lord came by means of [Graham McDonald, the prophet of] "**God Almighty**" - *Who people of ignorance call "Mother Nature"* - thus says the Lord of all people, *Consider your ways and set your mind on what has come to you. I have called for a drought upon the land.* [Haggai 1: 1, 5, 11]

Most of Australia has been ravaged by 13 years of drought. And parts of Australia are still being ravaged by drought. And, *this is the work of "Mother Nature" - whoever she is!* "Human Nature" has no role whatsoever, would *he*, in causing "Mother Nature" to act as *she* is?

Draw a vertical line through the centre of Northern Territory and South Australia, and divide Australia into two halves, West and East. The west half of Australia is still being *dried out* by drought, while the east half of Australia is being *drowned out* by floods. And, *all of this is the work of "Mother Nature"!*

"And when you spread forth your hands [in prayer, imploring help], I [God] will hide my eyes from you [and not hear or answer your prayer]; even though you make many prayers, I will not hear. YOUR HANDS ARE FULL OF BLOOD!" [Isaiah 1: 15]

Until the legislating politicians of Australia, Commonwealth, States, and Territories, learn, know and understand what "Your hands are full of blood" means, and the people also, the ME\$\$ continues!

As a nation, most people, especially **farmers**, are paying the price, because of the ignorance of politicians who make and pass human laws that appear to be *pleasing to the voters!* Let's *suck up to the voters*, and *tell them what we think they want to hear*, so we can stay in office and power. This previous sentence is not exclusive to labor or liberal, greens or nationals.

Australia is now paying the price, for decades of ignorance from consecutive governments at commonwealth, states and territories levels. No one government is excluded! All are included!

I will mail a copy of this document to Jock Laurie, with the following suggestion. He, as the newly appointed president of the National Farmers Federation, should convene a conference for each president and chief executive officer, of each state and territory farmers' federation or association, and invite the political agriculture ministers from each tier of government to also attend, and invite me in to address the conference, so I can teach them how to turn around the **farmers DEBT\$ ME\$\$E\$!**

Lobbying politicians for [*the cash god*] money, brings temporary respite, not sustainable solutions! Is money important? Absolutely! But, remember my previous comments regarding *the god, cash!*

## 5 About the writer of this letter:

Do I know anything about the farming business and business in general? I was Melbourne born and private school *educated*. It was only after leaving the *education system* that I gained *valuable teaching*. My maternal grandparents were **farmers**. I spent a lot of time with them on their farms, when I was growing up. I watched and learned, through personal experience. My grandparents ran their (12) farms debts free! **Debts Free!** This Can't Be! This is unheard of! Can't be true! He lies! Not so!

They sold a house in Geelong, and paid cash for the first farm land they bought. He was a builder. He built a house on this first farm property. He stocked it and cropped it. It started to return a two fold yield, then a five fold yield, then a ten fold yield, etc. They were very conservative. All profits were placed in a bank account. When there was enough cash in an account, they bought another farm, and did with it, as they did with the first. They now had two income streams. They kept putting the profits into the bank, until they had enough cash to buy another farm. Now, they have three farms and three income streams. They were debts free, and could ride out fluctuations! The farms fed us all!

I would later come to learn, that my grandmother, who I loved, was a Christian. And while my grandfather may have been the head of the family, my sweet little Christian grandmother was the boss. She called the shots with my grandfather, according to her Bible. Her example caused me to become a Christian in my later life, and not remain a *catholic religionist*, in whose cult I had been for 45 + years.

**Prayers** of religionists and atheists will never be heard or answered by God. Christian faith will! Are the **farmers** of Australia, *praying for answers and solutions*, that *traditional ways* can't provide?

"Then, all the **farmers** [who were in captivity] listened to and obeyed the voice of the Lord God [not vaguely or partly, but completely, according to] the words of Graham McDonald the prophet, since the Lord God had sent him, and the people [reverently] feared and [worshipfully] turned to the Lord." [Haggai 1: 12]. This is how **farmers can reverse their FARM'S CURSE\$ and their [DEBT\$] ME\$\$E\$!**

A recent television report states that 1 of 4 people die with cancer. My grandfather died with cancer. This sent me on a journey of studying diseases causes, especially **cancer**. Today, I know *causes*. This is why I founded **Cancer Causes & Cures Institute**. It doesn't matter what challenges people face, including and especially **farmers**. **Unless people understand causes, they can forget cures!**

As a LANDLINE reporter, you and EP Peter Lewis must decide if there is a story here, to put to air.

## OBSERVATIONS *and* OPINIONS:

### 6 Appearance Money:

Politician Brumby, the recently defeated labor premier of Victoria, thought it a *good investment* to entice Tiger Woods, the golfer, to come to Victoria, and play in an Australian golf championship. John Brumby paid Tiger Woods \$US3 million appearance money in 2009. Tiger Woods attracted many golf enthusiasts to the tournament course, to watch him play, as he won the championship. This was good for business, *and* brought additional \$ millions into the Victoria State economy, so it was said.

Tiger Woods was invited to return and defend his Australian golf title. He returned, to again receive \$US3 million appearance money in 2010. Tiger Woods lost his title.

Not long after, he also lost his marriage *and* his wife *and* his children, because he is a multiple times, sexual adulterer. *And* his sexual adultery, causing the loss of his wife *and* children, *has nothing whatsoever to do with his golf performance on the golf courses of the world, does it?* Oh, yes it does!

“Adultery is a trap [for the spiritually ignorant *and* stupid, who lack knowledge *and* understanding]! It catches those (farmers and people) with whom *the Lord God is angry*!” [Proverbs 22: 14]

Drought, floods, locusts, mice, debts *and* destruction are examples of, *anger of the Lord God!*

I wonder if in 2011, the new VIC coalition liberal party premier, Ted Baillieu, will be as willing as the former labor premier, to pay Tiger Woods, \$US3 million appearance money? Why waste our taxes!

The Victoria governments also thought it *an excellent idea* to steal the Formula 1 race from South Australia, *and* stage it around Albert Park! It is estimated to lose \$40 million taxes dollars each year! Over a ten years period, this is a \$400 million loss of taxes money. If politicians were held to be personally liable for such losses, as the directors of corporations, they would be hauled before the courts of Victoria, declared bankrupt, sequestered, *and*, should be thrown into a prison cell. But this is only my personal, *and* what may be considered, rather extreme, opinion. These *tax losses*, they would justify, as \$400 million appearance money, for the F1 race cars drivers to appear *and* race the F1 cars!

Commonwealth labor politician, Martin Ferguson, has freely justified the \$US5 million appearance money paid to Oprah Winfrey, to bring her and her tv show to Australia, because this will hopefully boost tourism, *and* attract much overseas money into the Australian business economy. So what does any of this have to do with farmers, drought, floods, locusts, mice and \$multi billions income loss to farmers, rural communities, and provincial cities, that rely heavily on the income from farmers?

If farmers across Australia aren't generating profits from their farms, they can't employ people to work on their farms; nor can they invest money into rural communities; nor can they spend profits they don't have, with small rural businesses, or large provincial businesses, can they? EVERYONE LOSE\$!

**\$ \$ \$** I wonder *if* Australian politicians, whose portfolio ministries are agriculture, would willingly pay appearance money millions to a man of God [Graham McDonald] who knows and understands the root causes for the drought, floods, locusts *and* mice, *and* the DEBT\$ ME\$\$\$ pestilence that most farmers across Australia, find themselves? He can't be serious! Appearance money millions is only for celebrities, *and* sports' stars, *and* tv personalities! People who have no solutions to contribute!

“Let them (politicians and farmers) who receive teaching in the Word [of God] (e.g., - how to farm debts free *and* in net profit, with their farming business) share “all” good things (including the cash god, money) with their teacher [Graham McDonald, contributing to his support].

[Politicians and farmers] do not be deceived and deluded and misled; God will not allow Himself to be sneered at (scorned, disdained, or mocked by mere pretensions or professions, or by His precepts being set aside). [Politicians and farmers inevitably delude themselves who attempt to delude God]. For whatever they sow, that *and* that only is what they [will] reap.” [Galatians 6: 6 - 7]

- If farmers don't like what they're harvesting, they should examine what they've been planting!
- Farmers must be prepared to change [spiritually] if they want to change their results [financially].

Unfortunately, many people [farmers] fear anything new. There is therefore, a normal inclination that most people [farmers] have, to flee to the shelter of the familiar and known, rather than risk change!

Once people [farmers - are given a personal invitation to] meet their Saviour, Who all people can meet, if they want, they should then pray, "Dear Lord God Almighty, help me to see my blind spots. Open my eyes and my mind and my heart to areas where I am not thinking or seeing correctly."

There are many "not thinking clearly and not seeing correctly" farmers across Australia, right now! Their flooded paddocks and crops destruction and DEBT\$ ME\$\$E\$ results evidence these truths!

7 **S O S** Summary Of Situations  
Farmers have gone- From DROUGHT
