Dear Sir/Madam

Re: Supplementary submission seeking to correct an error in Agrilink's submission dated 17 October 2003 to the Committee

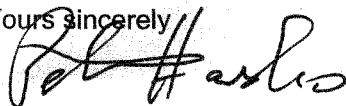

This morning it came to my attention that there is an error in Agrilink's submission dated 17 October 2003 to the Committee. The error is inadvertent and unintended and should have been picked up prior to lodgement of the submission. It describes one of Agrilink's products as being patented, when in fact a patent application has been lodged by Agrilink in relation to that product.

I seek the Committee's permission to regard this letter as a supplementary submission to Agrilink's 17 October 2003 submission, correcting the error as follows.

- The fifth paragraph on the first page of the Executive Summary of the submission states that "Agrilink has patented a soil moisture, salinity and temperature sensor ...". This should state that "Agrilink has a soil moisture, salinity and temperature sensor (which is the subject of a patent application by Agrilink) ...".
- The second paragraph of (a) on page 2 of the submission states that, "Agrilink's unique solution is to combine its newly patented salinity sensor ...". This should state that, "Agrilink's unique solution is to combine its salinity sensor (which is the subject of a patent application by Agrilink) ...".
- The first paragraph under the sub-heading 'Salinity sensor' on page 2 of the submission, states that, "Agrilink has patented a soil moisture, salinity and temperature sensor ...". This should read that, "Agrilink has a soil moisture, salinity and temperature sensor (which is the subject of a patent application by Agrilink) ...".

Agrilink apologises for the presence of this error and asks the Committee to accept this supplementary submission as a means to publicly rectify it.

Yours sincerely

Peter Hasko
Chief Executive
