

**CHAIR:** Roughly, what is the cost of such an audit? I don't need specifics

***EY's response:***

As disclosed by the ASX in response to Questions on Notice published 23 June 2023, EY's engagement fees to date (including the audit of the Special report on the current CHES system) represents approximately 2 per cent of the overall costs of the CHES replacement project.

**Senator SCARR:** And after the application of those risk mitigation strategies, was the risk at an acceptable level under their framework? I'm not saying it is an acceptable level. But from your review of the risk register, was it mitigated such that the risk came down to an acceptable level?

**Mr Fitzgerald:** I think we'll take that one on notice, if that's okay, because there are some elements of the risk register and residual risk that may touch upon my earlier statement about potential cyber risk and other risk to ASX. I don't think we should get into that level of detail.

***EY's response:***

We are unable to provide any further information on specifics of the risk register due to the potential for creating security vulnerabilities for the ASX.
