

I have many, many, many more similar accounts but I guess you would not be interested as Government investigations only want to protect their own. I can easily provide hardcopy evidence of staff providing false, misleading, malicious information to psychiatrists as an act of destroying an employees career as they were encouraged to do this and I had never seen a psychiatrist in my life until I was forced to attend one as a result of the threat I would be breaching the code of conduct of the APS if I didn't. From that point on the psychiatrist was corrupt and left out vital information and included only information that supported the cause of as he was paid a tidy sum by . This psychiatrist has been shown to be highly unethical and totally unprofessional as indicated by industrial courts but his corrupt report has my life not worth living.

I gave advice and industry knowledge as I was a racing and breeding employee prior to . Knowing of the situation in Japan I told supervisors that there was equine influenza in Japan before the EI outbreak but they bullied me and said I was a fool because I did not have a degree and they were educated at Gatton Ag College and I was ignored because they felt they were superior to myself. EI cost Australia billions of dollars and sent people broke. Supervisors to say this to me were who is still highly paid in the senior executive service, and who are senior management in Brisbane continually protected by corrupt Government Ministers and their secretaryies such as from who know they are a law unto themselves as they are a government agency and know they are lawless and untouchable because of it.

I agree with this comment from a paper as it is exactly how the APS operates and I was an APS employee for 9 years.

Bullying is a behavioural trait of many people I have worked with. It is so subtle. Vicious gossiping, ostracism, condescension and hypocrisy are its tools and are devastatingly effective in killing someone' s character and change his or her personality, destroy self esteem and instill doubts in that person. This in turn affects his/ her private life. I very much doubt if can be got rid of as it is virtually encouraged in the workplace. It should be made a serious crime not some kind of bad behaviour to be hushed.

My time within

I have been through the mill with these APS management for the past 11 years. I have been investigated for manufactured allegations of which cleared me of after a investigation found nothing could be shown.

I have been forced to be interviewed on tape of which they said I had no choice or I would be breaching the code of conduct. I participated as had no choice. I was then forced to attend a psychiatrist for the first tie in my life. This unprofessional paid witness in is a lying and malicious individual with zero credibility as he is on the nose of Courts which he has provided tainted evidence to in QLD on a regular basis.

left out many integral details and included details of my family members against the criteria set by for no other reason I can gather was to bully myself further. This report was subject to many senior executive service members in Canberra who had knowledge of my family members and my health through the report, of which I do no think was any of their business. This just displays Gov agencies are untouchable as no one will ever hold them accountable for my privacy and that of my family being disseminated by with no care in the slightest as they are a rule unto themselves as they are powerful and I am not.

also left out an involuntary admission to hospital as this would not favor his paying clients in . This report was a beatup and other reports compiled by have been shown to be biased in other industrial court cases of which I can name if necessary.

I was also investigated by a from quality management solutions in Canberra, this bloke is a total utter who did not even interview me but found I was to be dismissed as a result of his investigation as the findings were unambiguous. Then my employer believed his manufactured allegations as he was a former senior executive service member himself and terminated me.

is a former member of the senior executive service in Canberra and was paid by his friend & former colleague for his business in this so called investigation where he received free airfares and luxury accommodation in Brisbane when he pretended to interview myself but never did as he knew it wouldn't favor .

He was appointed by who was in at the time and knew he was always unaccountable. Issues leading up to my targeting and bullying were such as the regional manager of , in Qld, losing the plot one day in September of 2007 and swearing at me and threatening me very aggressively and violently in his office with the whole Centre building aware of what occurred and his PA having to slam the door shut in order to not offend visitors to the building. He apologised later that week on Friday in the presence of his PA and emailed the region that he was taking personal leave as a result. His outburst included threats and foul language but he got off and I was punished for anything could get me for. I provided a Statutory Declaration as a result of this to Department and other Gov agencies but they

say as I am no longer an employee they can not investigate anything which is why they sacked me of course.

the most senior officer in Qld was allowed off without any accountability as his friend was the head of investigation unit in and made sure he did not take my harassment claim seriously and threatened me further if I did so any investigation into his bullying was never going to be in my favor no matter what.

Hiring a totally non-independent & highly corrupt investigator is against the APS code of conduct as they are supposed to be agreed on and both and knew he wasn't independent but went ahead anyhow as they know they are unaccountable and untouchable as Ministers will support their corrupt actions. But it is obvious they breached APS code of conduct in appointing to investigate as he is a known former SES member in Canberra who leaches public funds for his own profits.

These are only a few of the things I have encountered along with HR manager of Qld, attending my residence on 2 occasions and then employing a messenger service to attend my residence to abuse and threaten my housemates as I was not at home. I have another 100 or more accounts of manufactured bullying towards myself of which the HR manager undoubtedly told totally malicious and misleading lies which were used in collateral evidence in his report to taint his perception of myself and destroy me. I did not sign anything at in order to release the report but he released it in any case which is against every law of medical privacy in Australia but Gov agencies are untouchable.

Having no funds for legal representation, I represented myself & I asserted that had a conflict of interest in having Commissioner Simpson hear my case as he was, unashamedly very close family friends with who was the and my boss at and he didn't notify me of this prior to hearing it and making a decision, but when I raised this at I was not liked by their full bench of another corrupt person in who owns and protects corrupt MPs like who gets his investigation held up because he has the power of the labor party behind him, unlike normal citizens.

who has no integrity or honesty just goes along with whatever management tell him and being a senior staffer in he was acting as a go between from Minister and Secretary of , an evil lowlife called and from within carried out investigations against me, of which he found zero but then he was performing dual roles in informing high ranking staff what was going on and giving directions to Brisbane staff on how to terminate my employment. He also played an integral role in protecting the highest ranking member of in QLD as a result of his threatening and abusive, foul mouthed outburst while he was in Brisbane in a highly paid position and still has a highly paid protected position within the senior executive service to this day as they are a law unto themselves.

the so called and highly paid director of within is a bad person with no integrity as he protected his friend when it was his sole and only role of his position to investigate unethical and corrupt and individuals but his own friend in had immunity to his investigations as he was his friend who he always protected. is highly corrupt and protects his colleagues no matter what and will set up whoever he likes with manufactured allegations so I will just say he is a dangerous person with power in and protected to the hilt by Ministers as they have no spinal cord and are guiltless human beings as I have dealt with them all and they tell their Department staff to brush me off as a troublemaker and make me pay which they have as I was dismissed in August 2009 as a result of dodgy, corrupt and totally unethical behaviour from who knows he is untouchable as a member of the senior executive service as that is how it is!

I have never done anything apart from want the best for the country, but I have had to cop this which has destroyed my life as these scum rule without accountability and their code of conduct means nothing to management as they are immune to accountability because the Gov always tells their senior staff to keep a lid on anything that can create debate or raise issues in society and that is how my life has been destroyed so I think the senior executive service need to be held accountable for high level bullying and encouragement of it FOREVER but as usual they will also be protected as this whole House of Reqs, Why have this if the cause is the Senior Executive Service being directed what to do by the MPs?????? When you will never

None of these will ever care unless they are made to pay!!!
