**Subject:** Sub 005:Plain Packaging Submission

Dear Members of the Standing Committee on Health & Ageing, I would like to express my Total disapproval of the Tobacco Plain packaging Bill 2011 introduced to the House of Representatives last week.

As an employee of the Tobacco Industry & someone who has voted Labour for the past 10 years I am deplored by this Bill to Impact Trade Marks and Intellectual property rights of a legal product!

As a Govt you have no right to impact my lively hood and the well being of my family.

My Vote for Labour was not a Vote for a Nanny State!

There is NO evidence to support any health benefits from this move, let alone a reduction in smoking rates.

All you will do is hurt working families & Small business.

My family & I will NEVER vote Labour again if this is to go thru.

Have you lost the ability to hear what people Want?

It's not Plain Packaging ...

I am at a Loss with your Direction & Decision making - as representatives of the Voting Public you need to Listen to what People want.

without Prejudice,

**Matthew J Landau**
