To Cl 17/02

Lynd Harrison - Committee Secretary.

I am in receipt of your letter 13-6-02. I reject the Committee's findings that the community misunderstands the purpose and role of the UN. That is explained quite adequately in 'The London Manifesto 1954'. It is a complete ceding of our sovereignty and independence to a New World Order, or World Government. Why is the concept of the New World Order never debated in Federal Parliament? Is it being connived by stealth, deceit and gradualism? such as the signing of treaties etc. without the knowledge or consent of the Australian people. I object to the UN having any control whatsoever over Australian affairs. The Federal government is elected to represent Australia and the people, it is not their role to delegate their responsibilities to an alien power, the unelected UN. Your reference to key government agencies is too vague, who and what are they, who do they represent? names and faces please! They are not the voice of Australia, and should not presume to be so. For the Committee's further enlightenment on the role and purpose of the UN. the book, 'The Fearful Master' by G. Edward Griffin, it is a complete expose of the origins of the UN. Until the Committee has read the book, it is they who misunderstand the role of the UN. You can fool some of the people some of the time, but there are those who will not be fooled.

Mr. J. John
