

**To the Honourable Speaker and Members of the House of Representatives**

This petition of the Environmentally Concerned Citizens of Orange draws attention to the House: Concerning legislation and strategies within the power of the Federal Government to urgently address the issue of climate change.

We therefore ask the House to:

- **Ensure Australia leads the way for a fair and strong global treaty on climate change**
- **Set a target of keeping carbon dioxide in the atmosphere below 350 parts per million by reducing emissions by 40% by 2020.**
