

**Subject:** Sub 105-Inquiry into IT Pricing  
**Date:** Tuesday, 12 February 2013 2:21:39 PM

---

I appreciate it is too late for a submission, but would like to bring to your attention another example where we are paying more for communications equipment than our US colleagues. In this case the equipment is **made in Australia**.

Winradio [winradio.com.au](http://winradio.com.au) makes communications equipment in Melbourne. A popular radio is the model WR-G305e. The price ordering online in this country is \$862.44 + GST. The price to our US colleagues is \$749.95. Why???
