RE: **Representation of the NT**

Dear Sir/Madam

I would like to make a submission to the inquiry please. I drove down to Batchelor yesterday and the rail gang were laying the track, I was driving on an excellent road and on my left was the World War 2 road we drove up on 30 years ago. Beside that road was the power line to Adelaide River and Batchelor that I supervised the construction of back before Cyclone Tracey. Next to the power line is the gas pipeline from Palm Valley to Channel Island Power House.

The development that has taken place over the last 30 years is nothing to what will take place in the next 5 years. We need every bit of representation we can get and now is not a good time to half what we have.

Kindest regards,

Ray Taylor
