**For the freedom of our Children to live the best possible lives they can.
For our Children to live and have opportunity to achieve their dreams.
For a Child to live without fear of emotional, physical or psychological abuse.
I submit the following to the inquiry.**

**Fathers and Mothers all start out as novice parents. We learn as we go along.
We learn what is best for our children, what is not.
It's about what Children need. Not what parents want.
The Child's needs are paramount.
When a parent puts his or her own agenda ahead of the future of a child this is generally the pattern, which will remain.
Children need strength in their lives. Stability. Routine. Positive reinforcement in a magnitude of areas.**

**The hardest thing I have found, is when there is separation, there is generalisation.
Your Child is only young. *No matter how bright or well developed our children are.*
A Child should always be with the Mother. *No matter what harm the mother poses.***

All cases are different.

**Judges and Magistrates bias. Legal Counsel knows who is Pro Mum and advises accordingly.
Legal Aid is making it very easy for persons to take action without worry of expense or the hardship that can be experienced.**
