This is my submission to the "Inquiry into the role and potential of the National Broadband Network".

**I make it in a purely personal capacity.**

**In implementing the NBN I feel a higher priority should be given to upgrading already established housing developments that include RIM exchanges, such as the Lincoln development in Bruce, in the ACT. These exchanges limit the speed of ADSL dramatically.**

**For a briefing on RIM exchanges, and their limitations, I refer the committee to:**

**I am also supportive of new housing developments been fibre enabled from the start.**
