Dear Dr Sullivan,

We note on pages M66-67 of the proof transcript of 1 June that Dr Wise had misrepresented the research method that we used in our survey of 457 visa holders. She is completely mistaken in saying that we sent the survey questionnaires to employers to give to their employees. The survey questionnaires were sent directly to 457 visa holders at their residential address, not to their employers or their workplace. The 457 visa holders' employers were never informed that their employees were being invited to participate in the survey.

Regards,
Siew-Ean Khoo
