

Committee Secretary  
Joint Standing Committee on Migration  
PO Box 6021  
Parliament House  
Canberra ACT 2600  
Australia

Hello,

I wish you to accept the following as my input to the committee.

I have worked with many people over my 44 years of employment, people of various colours, from all over the world and people of various religions. In many ways they have contributed to the well being of all Australians and have advanced Australia in a very positive way. I have made many friends amongst them all and I believe our lives are much richer and more positive because of them. Their food, their desire for freedom, equality, happiness and willingness to blend into Australia has made this country the envy of the world.

This said I have without exception found the Muslim person to be a social misfit. I have tried in every case to befriend, help or in any way to assist them. In every case I have failed. As if hypnotised, they follow a different life, one that does not allow deviation from some plan, one that allows different levels of human life, an unjust Bronze Age law system that is at times beyond belief. Christians from the Middle East are not a problem, just the Muslims.

We have been told by various governments that we are a multicultural country. This may have been somebody's ideal but it has not worked and will never work while this group are involved. Their religion is in conflict with the world, in every country they are a real problem. In many cases they are dangerous to their host country.

An opposing energy is growing globally and I believe at some stage in the not too distant future this will ignite in a planet wide war against them.

We have had a wonderful mix of people, a group prepared to die for freedom, where the government can lead and organise, people that respect elected authority. We have a history of helping the many causes around the world, even the Middle East.

My view of this one group is this; the Muslim is a selfish person that accepts help from everyone he can draw to his cause, he is a professional victim that lives on the emotions of any fool that will listen. He will never integrate in a non Muslim community; in fact will make the lives of opponents miserable or even kill to repel them.

In every other group, the next generation usually blend in better than the original. What are the Muslims passing on to their young when their descendants are more dangerous than the parents? There are many examples of the extreme terror and hatred they have inflicted worldwide.

They interfere in politics beyond their share of representation as if organised as a group from outside the country. All levels of government are involved.

We have fought for the separation of church and state and they fight to replace it with theirs. I find this one group to be just too big a problem for Australia when they are disproportionately represented in drugs and virtually every branch of crime. They enslave

women, they punish women rape victims and justify their Sharia law. I believe they are over represented in receiving government support and benefits.

While we fight for their countries, rather than help us, they live off us. Our war history involves many Middle Eastern countries and yet we still serve them. We are building Mosques and Islamic only schools and yet they demand more. We cannot celebrate our own culture without complaint from them. They interfere with hate at every level.

I could go on but I now wish to convey to the committee that I don't accept multiculturalism in its present form and I will not vote for any government that tries to maintain it. The Muslim does not fit in a free society. He belongs back in the Middle East where he can practice his hatred and horrible culture. We have given him the opportunity of love, acceptance and freedom and he has only replied with hate, enslavement, murder, crime and dominance of our ways and serious political interference. I see what they have achieved in Europe, Britain, Canada, USA, and everywhere they go they destroy the host country for their own selfish ways.

There are many people out there that are prepared to blend in and work with us and support our beliefs, people that are desperate and in need of help and protection. These are the ones that we need to save and protect. This is what we have done with much success after the various wars.

Australia must take the lead now and stop this branch of the Worldwide Islamic invasion. I have nothing positive to say of this group and just want to see them removed from our society as they are not at all compatible. We have lost too many lives over many years achieving what we have. I am not prepared to give it away to any hateful and selfish fanatic that wants to steal and destroy it.

I would like to refer you to an item that appealed to me in the 2011 January – February Quadrant Magazine. It was submitted by a Russian migrant and it is a wonderful work entitled "How to choose better migrants" by Michael Galak.

Regards
