

**Australian Parliament  
Joint Standing Committee on Migration  
Submission no. 406**

To the Immigration Secretary,

It seems common sense regarding planning for intergration of our immigrants is missing. When, will all immigrants be expected to actually immigrate again.?When will it be mandatory that they become Australian-NOT creating enclaves of culture within our community that is a copy of the home land they have left.If that homeland was so unsatisfactory;its ridiculous that its being re created here & seemingly with government help.I cannot voice my objection adequately.Who is in control here?

I suggest those guests in our country who prefer the traditions of their previous home be invited to return there; OR,they learn to embrace Australian life & all that entails.

I suggest that our reputation as the lucky country is in serious jeopardy! We are becoming a joke with our policies.

On another topic; I am personally ashamed that our pensioners are treated so badly in comparison to the benefits these people are given.Many pensioners have worked to provide the very benefits being given to others.Its a disgrace!!!!!!
