

Film Inquiry
Submission No. 15.....

Submission to the House of Representatives Standing Committee on Communications, Information Technology and the Arts., and its

Inquiry into future opportunities for Australia's film, animation, special effects & electronic games industries.

Regarding the Issues outlined in your leaflet, I submit that a matter of primary importance is "the likely effect of international agreements on"

I am presuming that this would apply to ~~the present~~ "free trade" with other countries, notably the United States. Completely unfettered access by the U.S. entertainment industry to Australian markets would do great harm to Australia. Concern about this seems to appear in the rest of this Issues item's wording, and this matter should be given priority consideration.

Dorah Foster.

(Mrs.) D.M. Foster.
