

As the shires run in and unlawful state ! I do wish to record at your commission that it would be a travesty of justice just to recognize these body's legitimizing all their unlawful local by laws in any document by the people for the people ! All these previously local are now super shires not local at all and know you would be hard pushed to find any local doing the jobs like town planning and engineering ! the corruption in many so called local shires is despicable ! and I will not vote to have these incorporated bodies recognized !
