Subject: WTO - It's a worry

Dear Sir:

I would support a dismantling of the powerful World Trade Organisation. I believe it does not act in the public interest or for the good of humanity. While it's origins were noble, things have changed. A world where corporations are stronger than governments, and where production and consumerism are more important than human values is, in my opinion, not sustainable.

Thank you for the opportunity to have a say.

Best regards,

Madelyn Devlin
