

SUBMISSION INTO THE INQUIRY ON ELECTRONIC PETITIONING

From Estelle Ross

July 30th 2008

Having spent countless hours standing in freezing cold winds or baking on hot summer days collecting signatures for petitions here in Tasmania over the years, I would welcome the concept of electronic petitioning. It would also provide a much wider access to members of the public and thus enable a more accurate viewpoint for the government to use as a basis for decisions on contentious issues.

I hope the enquiry is successful in achieving electronic petitioning..
