Submission No. 100

Dear President,

This letter is to express our concern and absolute opposition to any form of international treaty or system which would take precedence over our own Australian Courts and justice system. We believe that the Australian people have not been given any consideration in having their opinion or say in this matter or in many other issues for that matter which directly concern them and this great country of ours and our democratic system which is constantly under attack by those with vested interests of their own.

Yours sincerely,
M. Salmon
J. Salmon.
