

**Australian Parliament  
Joint Standing Committee on Migration  
Submission no. 206**

Dear Committee Members,

Our history of immigration has been one to be proud of.

I went to school with and made lifelong friendships with immigrants from many different cultures.

My grandparents were immigrants.

After certain events 10 years ago, I made a study of the Koran, and discovered what makes Jihadists tick.

The Holy Book is full invitations to make "war" not "peace".

Eg Sura2:193 "fight against them.....until God's religion reigns supreme"

Sura8:39 "make war on them....until God's religion reigns supreme"

Sura 34: 28 "...non-muslims submit to conversion or subjugation...if they do not, Muslims are obliged to wage war against them. World peace is reached **only with the conversion or submission of all mankind to Islam**".

The history of violent Islamic invasion is on the record from the 7<sup>th</sup> century. Nothing has changed except that Gaddafi once said that war will not be necessary because immigration will accomplish this in a generation.

This is exactly what is happening in France and Germany where enclaves exist that police dare not enter. These are virtually States within a State. Dozens of Sharia courts now exist in Britain.

Religion that does not separate church and state will undermine our democracy.

Multiculturalism has been declared a failure in these countries and should be discarded as a dangerous concept here.
