

**Senate Standing Committee on Environment and Communications
Legislation Committee**
Answers to questions on notice
Environment and Energy portfolio

Question No: 224
Hearing: Budget Estimates
Outcome: Agency
Programme: Clean Energy Regulator (CER)
Topic: Eligible Interest Holder Consent
Hansard Page: 65
Question Date: 23 May 2017
Question Type: Spoken

Senator URQUHART asked:

Senator URQUHART: Narrow it down to the native title, yes. The Senate inquiry into the carbon credits amendment bill noted that some projects that have received conditional consents under the existing framework have failed to seek consent from native title holders. That inquiry reported that the department commented that it understood that proponents of some projects with conditional declarations had not yet sought to comply with the consent requirements, as they expected that the CFI act would be amended. Is that correct?

Ms Swirepik: That could be true. You would have to ask our individual clients that, but it is important to note that an Emissions Reduction Fund project can be registered conditionally, as you said, and what that needs up-front is legal right. Consent can then be got after the initial project registration, and at that point it can become unconditional and accrue ACCUs. We would not be able to tell you individually where each of those participants is up to, in actually seeking their consent.

Senator URQUHART: You can or you cannot?

Ms Swirepik: No, we would not be able to tell you exactly. We can tell you which ones have come in and have had their consents fulfilled.

Senator URQUHART: Can you provide that information?

Ms Swirepik: Yes.

Answer:

The Clean Energy Regulator only registers projects in the Emissions Reduction Fund if the project meets eligibility requirements of the *Carbon Credits (Carbon Farming Initiative) Act 2011* (the Act).

All project proponents must declare they have the legal right to carry out the project before the project is registered. In addition, area-based offsets projects must obtain consent from all Eligible Interest Holders, including any relevant Native Title groups. The Act allows project proponents to have a project conditionally declared and then obtain Eligible Interest Holder consents, after the project is registered.

Although the Act does not prescribe when a project proponent must commence the process of seeking consents, all consent must be obtained before the end of the first project reporting period and prior to any Australian carbon credit units (ACCUs) being issued.

The Senate Environment and Communications Legislation Committee inquiry into the *Carbon Credits (Carbon Farming Initiative) Amendment Bill 2017* focussed on the proposed amendment to section 28A of the Act. The proposed amendment of section 28A would, if passed, remove the need for Eligible Interest Holder consents for savanna burning projects

and other area-based emissions avoidance projects. Sequestration offsets projects would still require Eligible Interest Holder consents.

As at 9 June 2017, there were 469 registered area-based offset projects. Of these, 395 were sequestration projects and 74 were savanna burning emissions avoidance projects.

As at 9 June 2017, the following 226 sequestration projects and 54 savanna burning emissions avoidance projects have fulfilled Eligible Interest Holder consent requirements and have unconditional declarations.

Project Name	Project ID	Method Type	Project Location
West Arnhem Land Fire Abatement (WALFA) Project	EOP100945	Savanna Burning (Emissions Avoidance)	NT
