RENEWABLES

UNDERMINED SUSTAINABLE ENERGY SOURCES

The LNP has undermined and ignored the renewables sector, driving sustainable jobs out of the state.

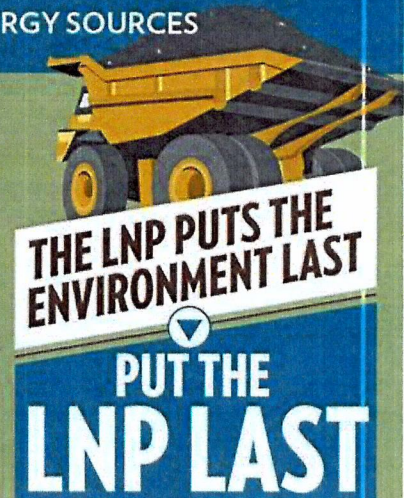

They've cancelled the solar feed-in tariff, cancelled Climate Smart and allowed restrictions on solar feed-in.

At the same time, they've gone out of their way to promote dirty fossil fuel energy sources that threaten our drinking water, farming land and natural heritage.

With the Newman government, the environment comes last.
