

Green Car Funding

Do you have a project that will reduce fuel consumption and/or greenhouse gas emissions of passenger motor vehicles?

If so, the Australian Government's Green Car Innovation Fund (GCIF) offers grants from \$100,000

Eligible GCIF activities include research and development, proof-of-concept, early-stage commercialisation and pre-production development work.

Take the first step. Submit an enquiry form and have a customer service manager contact you to discuss the project and ensure your application contains the vital information needed for assessment.

For further information visit ausindustry.gov.au, email hotline@ausindustry.gov.au or phone the AusIndustry hotline on 13 28 46.
