Please note this response does not include publications produced by the Commonwealth Scientific and Industrial Research Organisation (CSIRO). CSIRO consists of eleven National Research Flagships, 13 research divisions and a number of other research and support units at over 55 sites across Australia. The responsibility for purchasing and supply of printing is administered locally at each site. Additionally CSIRO's expenditure on printing is included with other miscellaneous items that cannot be attributed to any identifiable codes for example plant hire, laundry and newspapers, in expenditure transactions under CSIRO's miscellaneous

materials supplies and services code. It would require a manual check of the financial records of all of CSIRO's sites for the specified period to identify transactions relevant to the items in question. This manual check would involve an unreasonable diversion of resources.
