Question Number: W029-07

Question:

Senator Wong asked at *Hansard* page 72:

Does the IT system enable the department to determine which questions were altered in a JSCI reclassification by Centrelink or by a Job Network member?

Answer:

Yes, a complete history of each JSCI record is kept in the IT system. Each historical record includes the answers to each JSCI question, the JSCI result and the JSCI score as well as the unique UserID of the user who updated each JSCI record. Comparison of sequential records for individual job seekers indicates which questions have been changed and by which user.
