Vessel Permit to Work

Distribution

- White:** Original person seeking permit
- Pink:** Retain on bridge
- Yellow:** Chief Engineer/Control Room
- Blue:** Master copy book

1. DETAILS

Vessel's name: SSV
 Work requested by: P70
 Location of work on vessel: AGT Grinding Deck
 Date: 12/4/07
 Outside contractors
 Company: TAYLOR BROTHERS
 Contractors name: AARON WILSON STACEY SCREE
 Responsible person: _____

2. DESCRIPTION OF WORK TO BE UNDERTAKEN

INSTALLING STORM COVERS HOT WORK WELDING

3. CONFINED SPACE

The items ticked below have been isolated or made safe:

- Pipelines (water, steam, gas, etc)
- Mechanical/electrical drives
- Sludges/deposits/waste
- Harmful materials
- Electrical services
- Warning notices, locks, or tags have been fitted to means of isolation
- Radiation services

a) PURGING AND VENTILATION

Purging and ventilation measures listed below have been implemented:

- Purging of space
- Ventilation of space
- Continuous ventilation of space required

b) ATMOSPHERIC TEST REQUIREMENT

The test equipment has been calibrated and the atmosphere has been tested for: (fill in details and results of the tests)

- Safe oxygen level: _____
 Testing time: _____ Date: _____
- Atmosphere contaminant(s) (list contaminants, concentrations and compare with exposure standards): _____
 Testing time: _____ Date: _____

Flammable atmosphere (give % LEL)

- Testing time: _____ Date: _____
- Continuous monitoring for atmosphere contaminants required
- Continuous monitoring flammable gas detector

The atmosphere is safe for entry under the conditions ticked below:

- With a supplied-air respiratory protective device.
- With an air purifying (non air-supplied) respiratory protective device.
- Without a respiratory protective device.

4. HOT WORK

The precautions ticked below must be observed:

- Area clean and free of all readily combustible materials.
- A water hose run to job site and tested.
- Welding machine earthed directly to equipment being welded as close to the welding point as possible.
- Power leads not draped across pipelines or access ways.
- Electrical trace on pipes located. Hot work is/ is not permissible inside this space.
- Coatings stripped to minimise fire risks.
- Need for firewatcher.
- Portable fire extinguisher at hand.
- Any J.S.A. identified and observed.
- Adjacent spaces checked.
- Isolate fire zones (if applicable).
- Greater than 500 meters from Platform.

5. MECHANICAL/ELECTRICAL ISOLATION

- Tag System used. PORT ER FAN
- J.S.A. followed (if applicable).
- Other personnel verbally advised.
- Other hazards identified and isolated.
- All moving machinery close to work area shut down or safeguarded.
- Isolation switches etc. engaged.

6. WORKING ALOFT/OVERBOARD

- Harness supplied and safe to use.
- Any electrical or other hazards identified.
- Portable power leads/equipment safe to use.
- Isolate and tag radar/satellite communications.
- J.S.A. adhered to (if applicable).

7. GENERAL REQUIREMENTS

a) USE OF CHEMICAL AGENTS (Details to be completed)

No chemical agents other than those listed below may be taken into the confined space: _____

b) STAND-BY PERSONNEL AND RESCUE ARRANGEMENTS

The following arrangements have been made:

- Stand-by person(s) are (identify): DAVE HAROS
- Alternative to stand-by (specify arrangements): _____
- Communications arrangements: _____
- Rescue and emergency procedures are understood and have been posted.

c) OTHER CONTROL MEASURES

Smoking is banned in the confined space and adjoining area.

Measure ticked below have been implemented:

- Warning notices/barricades are in position.
- Special precautions (ie vessels/contractors equipment) _____
- Port requirements complied with.

d) PERSONAL PROTECTIVE EQUIPMENT

The personal protective equipment ticked below shall be worn, (specify details where appropriate):

- Supplied-air respirators: _____
- Air purifying respiratory protective devices: _____
- Safety harness and/or safety line or lifeline/rescue line: _____
- Eye protectors: _____
- Hand protection: _____
- Safety boots: _____
- Protective clothing: _____
- Hearing protectors: _____
- Safety helmets: _____
- Other: _____

8. SIGN IN PERMIT

The above conditions have been advised to me and are clearly understood. It is agreed all conditions of this permit system will be undertaken (as required).

Responsible Person Signature: A.T. Wilson

Permit Open (Time): 0821

Master/Chief Engineer/Mate: San. C.

Date: 12-4-07

9. WORK COMPLETED/SUSPENDED

All person have been withdrawn, the work has been suspended or completed. The workplace covered by this permit has been left in a safe condition.

- List continuing deficiencies:

10. SIGN OUT PERMIT

Responsible Person Signature: A.T. Wilson

Permit Close (Time): 1621

All personnel have exited confined spaces, ceased all hot work and equipment is safe to be used or has been tagged out and no personnel are working aloft, overboard.

Master/Chief Engineer/Mate: San. C.

Date: 12/4/07

Permit No: 4252

- Without a respiratory protective device.

4. HOT WORK

The precautions ticked below must be observed:

- Area clean and free of all readily combustible materials.
- A water hose run to job site and tested.
- Welding machine earthed directly to equipment being welded as close to the welding point as possible.
- Power leads not draped across pipelines or access ways.
- Electrical trace on pipes located. Hot work is not permissible inside this space.
- Coatings stripped to minimise fire risks.
- Need for firewatcher.
- Portable fire extinguisher at hand.
- Any J.S.A. identified and observed.
- Adjacent spaces checked.
- Isolate fire zones (if applicable).
- Greater than 500 meters from Platform.

5. MECHANICAL/ELECTRICAL ISOLATION

- Tag System used.
- J.S.A. followed (if applicable).
- Other personnel verbally advised.
- Other hazards identified and isolated.
- All moving machinery close to work area shut down or safeguarded.
- Isolation switches etc. engaged.

6. WORKING ALOFT/OVERBOARD

- Harness supplied and safe to use.
- Any electrical or other hazards identified.
- Portable power leads/equipment safe to use.
- Isolate and tag radar/satellite communications.
- J.S.A. adhered to (if applicable).

7. GENERAL REQUIREMENTS

a) USE OF CHEMICAL AGENTS (Details to be completed)

No chemical agents other than those listed below may be taken into the confined space: _____

b) STAND-BY PERSONNEL AND RESCUE ARRANGEMENTS

The following arrangements have been made:

- Stand-by person(s) are (identify): _____
- Alternative to stand-by (specify arrangements): _____
- Communications arrangements: _____
- Rescue and emergency procedures are understood and have been posted.

c) OTHER CONTROL MEASURES

Smoking is banned in the confined space and adjoining area. Measures ticked below have been implemented:

- Warning notices/barricades are in position.
- Special precautions (ie vessel's/contractors equipment) _____
- Port requirements complied with.

d) PERSONAL PROTECTIVE EQUIPMENT

The personal protective equipment ticked below shall be worn, (specify details where appropriate):

- Supplied-air respirators: _____
- Air purifying respiratory protective devices: _____
- Safety harness and/or safety line or lifeline/rescue line: _____
- Eye protectors: _____
- Hand protection: } PPE IS THE
- Safety boots: } RESPONSIBILITY
- Protective clothing: } CONTRACTOR
- Hearing protectors: _____
- Safety helmets: _____
- Other: _____

8. SIGN IN PERMIT

The above conditions have been advised to and are clearly understood. It is agreed all conditions of this permit system will be undertaken (as required).

Responsible Person Signature: _____

Permit Open (Time): 1100

Master/Chief Engineer/Mate: PAU CUBO

Date: 24.09.07

9. WORK COMPLETED/SUSPENDED

All person have been withdrawn, the work has been suspended or completed. The workplace covered by this permit has been left in a safe condition.

- List continuing deficiencies:

10. SIGN OUT PERMIT

Responsible Person Signature: _____

Permit Close (Time): 1500

All personnel have exited confined spaces, ceased all hot work and equipment is safe to be used or has been tagged out and no personnel are working aloft, overboard.

Master/Chief Engineer/Mate: PAU CUBO

Date: 24/9/07

Permit No: 4258

Tag No: _____

P&O Maritime Services

Vessel Permit to Work

Distribution

White: Original person seeking permit
 Pink: Retain on bridge
 Yellow: Chief Engineer/Control Room
 Blue: Master copy book

1. DETAILS

Vessel's name: SSV
 Work requested by: P&O
 Location of work on vessel: Dry Store
 Date: 24-04-07
 Outside contractors
 Company: _____
 Contractors name: TB
 Responsible person: Rob Pyke
Stacy Clea

2. DESCRIPTION OF WORK TO BE UNDERTAKEN

+ Ballast Pipe Repairs

3. CONFINED SPACE

The items ticked below have been isolated or made safe:

- Pipelines (water, steam, gas, etc)
- Mechanical/electrical drives
- Sludges/deposits/waste
- Harmful materials
- Electrical services
- Warning notices, locks, or tags have been fitted to means of isolation
- Radiation services

a) PURGING AND VENTILATION

Purging and ventilation measures listed below have been implemented:

- Purging of space
- Ventilation of space
- Continuous ventilation of space required

b) ATMOSPHERIC TEST REQUIREMENT

The test equipment has been calibrated and the atmosphere has been tested for: (W in details and results of the tests)

- Safe oxygen level: _____
 Testing time: _____ Date: _____
- Atmosphere contaminant(s) (list contaminants, concentrations and compare with exposure standards): _____

Testing time: _____ Date: _____

- Flammable atmosphere (give % LEL)
 Testing time: _____ Date: _____
- Continuous monitoring for atmosphere contaminants required
- Continuous monitoring flammable gas detector

The atmosphere is safe for entry under the conditions ticked below:

- With a supplied-air respiratory protective device.
- With an air purifying (non air-supplied) respiratory protective device.
- Without a respiratory protective device.

4. HOT WORK

The precautions ticked below must be observed:

- Area clean and free of all readily combustible materials.
- A water hose run to job site and tested.
- Welding machine earthed directly to equipment being welded as close to the welding point as possible.
- Power leads not draped across pipelines or access ways.
- Electrical trace on pipes located. Hot work is/is not permissible inside this space.
- Coatings stripped to minimise fire risks.
- Need for firewatcher.
- Portable fire extinguisher at hand.
- Any J.S.A. identified and observed.
- Adjacent spaces checked.
- Isolate fire zones (if applicable).
- Greater than 500 meters from Platform.

Zone 5

5. MECHANICAL/ELECTRICAL ISOLATION

- Tag System used.
- J.S.A. followed (if applicable).
- Other personnel verbally advised.
- Other hazards identified and isolated.
- All moving machinery close to work area shut down or safeguarded.
- Isolation switches etc. engaged.

6. WORKING ALOFT/OVERBOARD

- Harness supplied and safe to use.
- Any electrical or other hazards identified.
- Portable power leads/equipment safe to use.
- Isolate and tag radar/satellite communications.
- J.S.A. adhered to (if applicable).

7. GENERAL REQUIREMENTS

a) USE OF CHEMICAL AGENTS (Details to be completed)

No chemical agents other than those listed below may be taken into the confined space: _____

b) STAND-BY PERSONNEL AND RESCUE ARRANGEMENTS

The following arrangements have been made:

- Stand-by person(s) are (identify): _____
- Alternative to stand-by (specify arrangements): _____
- Communications arrangements: _____
- Rescue and emergency procedures are understood and have been posted.

c) OTHER CONTROL MEASURES

Smoking is banned in the confined space and adjoining area. Measure ticked below have been implemented:

- Warning notices/barricades are in position.
- Special precautions (ie vessel's/contractors equipment) _____
- Port requirements complied with.

d) PERSONAL PROTECTIVE EQUIPMENT

The personal protective equipment ticked below shall be worn, (specify details where appropriate):

- Supplied-air respirators: _____
- Air purifying respiratory protective devices: _____
- Safety harness and/or safety line or lifeline/rescue line: _____
- Eye protectors: _____
- Hand protection: _____
- Safety boots: _____
- Protective clothing: _____
- Hearing protectors: _____
- Safety helmets: _____
- Other: _____

8. SIGN IN PERMIT

The above conditions have been advised to me and are clearly understood. It is agreed all conditions of this permit system will be undertaken (as required).

Responsible Person Signature: _____
 Permit Open (Time): 14:00
 Master/Chief Engineer/Mate: R.P.
 Date: 24-04-07

9. WORK COMPLETED/SUSPENDED

All person have been withdrawn, the work has been suspended or completed. The workplace covered by this permit has been left in a safe condition.

- List continuing deficiencies: _____

10. SIGN OUT PERMIT

Responsible Person Signature: _____
 Permit Close (Time): 16:00
 All personnel have exited confined spaces, ceased all hot work and equipment is safe to be tagged or has been tagged out and no personnel are working aloft, overboard.

8. SIGN IN PERMIT

The above conditions have been advised to me and are clearly understood. It is agreed all conditions of this permit system will be undertaken (as required).

Responsible Person Signature: _____

Permit Open (Time): 07:00

Master/Chief Engineer/Mate: Seacy

Date: 25-4-07

9. WORK COMPLETED/SUSPENDED

All person have been withdrawn, the work has been suspended or completed. The workplace covered by this permit has been left in a safe condition.

- List continuing deficiencies:

10. SIGN OUT PERMIT

Responsible Person Signature: _____

Permit Close (Time): 13:20

All personnel have exited confined space/s, ceased all hot work and equipment is safe to be used or has been tagged out and no personnel are working aloft, overboard.

Master/Chief Engineer/Mate: AD

Date: 25-04-07

Permit No: 4264

Tag No: _____

P&O Maritime Services

Vessel Permit to Work

Distribution

White: Original person seeking permit
 Pink: Retain on bridge
 Yellow: Chief Engineer/Control Room
 Blue: Master copy book

1. DETAILS

Vessel's name: SSV
 Work requested by: P.O.
 Location of work on vessel: TANK P.O.
 Date: 25-4-07
 Outside contractors
 Company: Amerson Ltd Taylor's
 Contractors name: Liam Amerson
 Responsible person: Don Gifford

2. DESCRIPTION OF WORK TO BE UNDERTAKEN

TANK CHANGE P.O./DRAIN/COVER

3. CONFINED SPACE

The items ticked below have been isolated or made safe:

- Pipelines (water, steam, gas, etc)
 Mechanical/electrical drives
 Sludges/deposits/waste
 Harmful materials
 Electrical services
 Warning notices, locks, or tags have been fitted to means of isolation
 Radiation services

a) PURGING AND VENTILATION

Purging and ventilation measures listed below have been implemented:

- Purging of space
 Ventilation of space
 Continuous ventilation of space required

b) ATMOSPHERIC TEST REQUIREMENT

The test equipment has been calibrated and the atmosphere has been tested for: (fill in details and results of the tests)

Safe oxygen level: 20.7
 Testing time: 25 0711 Date: 25-4-07

Atmosphere contaminant(s) (list contaminants, concentrations and compare with exposure standards):

Testing time: _____ Date: _____

- Flammable atmosphere (give % LEL)
 Testing time: _____ Date: _____
 Continuous monitoring for atmosphere contaminants required
 Continuous monitoring flammable gas detector

The atmosphere is safe for entry under the conditions ticked below:

- With a supplied-air respiratory protective device.
 With an air purifying (non air-supplied) respiratory protective device.
 Without a respiratory protective device.

4. HOT WORK

The precautions ticked below must be observed:

- Area clean and free of all readily combustible materials.
 A water hose run to job site and tested.
 Welding machine earthed directly to equipment being welded as close to the welding point as possible.
 Power leads not draped across pipelines or access ways.
 Electrical trace on pipes located. Hot work is/ is not permissible inside this space.
 Coatings stripped to minimise fire risks.
 Need for firewatcher.
 Portable fire extinguisher at hand.
 Any J.S.A. identified and observed.
 Adjacent spaces checked.
 Isolate fire zones (if applicable).
 Greater than 500 meters from Platform.

5. MECHANICAL/ELECTRICAL ISOLATION

- Tag System used.
 J.S.A. followed (if applicable).
 Other personnel verbally advised.
 Other hazards identified and isolated.
 All moving machinery close to work area shut down or safeguarded.
 Isolation switches etc. engaged.

6. WORKING ALOFT/OVERBOARD

- Harness supplied and safe to use.
 Any electrical or other hazards identified.
 Portable power leads/equipment safe to use.
 Isolate and tag radar/satellite communications.
 J.S.A. adhered to (if applicable).

7. GENERAL REQUIREMENTS**a) USE OF CHEMICAL AGENTS (Details to be completed)**

No chemical agents other than those listed below may be taken into the confined space: _____

b) STAND-BY PERSONNEL AND RESCUE ARRANGEMENTS

The following arrangements have been made:

Stand-by person(s) are (identify): Clay

Alternative to stand-by (specify arrangements): _____

Communications arrangements: radio

Rescue and emergency procedures are understood and have been posted.

c) OTHER CONTROL MEASURES

Smoking is banned in the confined space and adjoining area. Measures ticked below have been implemented:

- Warning notices/barricades are in position.
 Special precautions (ie vessels/contractors equipment) _____

Port requirements complied with.

d) PERSONAL PROTECTIVE EQUIPMENT

The personal protective equipment ticked below shall be worn, (specify details where appropriate):

- Supplied-air respirators: _____
 Air purifying respiratory protective devices: _____
 Safety harness and/or safety line or lifeline/rescue line: _____
 Eye protectors: _____
 Hand protection: _____
 Safety boots: _____
 Protective clothing: _____
 Hearing protectors: _____
 Safety helmets: _____
 Other: _____

8. SIGN IN PERMIT

The above conditions have been advised to me and are clearly understood. It is agreed all conditions of this permit system will be undertaken (as required).

Responsible Person Signature: _____

Permit Open (Time): 0714

Master/Chief Engineer/Mate: SKG

Date: 25-4-07

9. WORK COMPLETED/SUSPENDED

All person have been withdrawn, the work has been suspended or completed. The workplace covered by this permit has been left in a safe condition.

List continuing deficiencies: _____

10. SIGN OUT PERMIT

Responsible Person Signature: _____

Permit Close (Time): 1010

All personnel have exited confined spaces, ceased all hot work and equipment is safe to be used or has been tagged out and no personnel are working aloft, overboard.

Master/Chief Engineer/Mate: _____

Date: 25-04-07

Permit No: 4265

b) ATMOSPHERIC TEST REQUIREMENT

The test equipment has been calibrated and the atmosphere has been tested for: (N/A in details and results of the tests)

- Safe oxygen level: _____
 Testing time: _____ Date: _____
- Atmosphere contaminant(s) (list contaminants, concentrations and compare with exposure standards): _____
 Testing time: _____ Date: _____

- Flammable atmosphere (give % LEL)
 Testing time: _____ Date: _____

- Continuous monitoring for atmosphere contaminants required
- Continuous monitoring flammable gas detector

The atmosphere is safe for entry under the conditions ticked below:

- With a supplied-air respiratory protective device.
- With an air purifying (non air-supplied) respiratory protective device.
- Without a respiratory protective device.

4. HOT WORK

The precautions ticked below must be observed:

- Area clean and free of all readily combustible materials.
- A water hose run to job site and tested.
- Welding machine earthed directly to equipment being welded as close to the welding point as possible.
- Power leads not draped across pipelines or access ways.
- Electrical trace on pipes located. Hot work is/ is not permissible inside this space.
- Coatings stripped to minimise fire risks.
- Need for firewatcher.
- Portable fire extinguisher at hand.
- Any J.S.A. identified and observed.
- Adjacent spaces checked.
- Isolate fire zones (if applicable).
- Greater than 500 meters from Platform.

Zone 10

5. MECHANICAL/ELECTRICAL ISOLATION

- Tag System used.
- J.S.A. followed (if applicable).
- Other personnel verbally advised.
- Other hazards identified and isolated.
- All moving machinery close to work area shut down or safeguarded.
- Isolation switches etc. engaged.

6. WORKING ALOFT/OVERBOARD

- Harness supplied and safe to use.
- Any electrical or other hazards identified.
- Portable power leads/equipment safe to use.
- Isolate and tag radar/satellite communications.
- J.S.A. adhered to (if applicable).

7. GENERAL REQUIREMENTS

a) USE OF CHEMICAL AGENTS (Details to be completed)
 No chemical agents other than those listed below may be taken into the confined space: _____

b) STAND-BY PERSONNEL AND RESCUE ARRANGEMENTS

- The following arrangements have been made:
- Stand-by person(s) are (identify): _____
 - Alternative to stand-by (specify arrangements): _____
 - Communications arrangements: _____
 - Rescue and emergency procedures are understood and have been posted.

c) OTHER CONTROL MEASURES

- Smoking is banned in the confined space and adjoining area. Measures ticked below have been implemented:
- Warning notices/barricades are in position.
 - Special precautions (ie vessel/contractors equipment) _____
 - Port requirements complied with.

d) PERSONAL PROTECTIVE EQUIPMENT

- The personal protective equipment ticked below shall be worn, (specify details where appropriate):
- Supplied-air respirators: _____
 - Air purifying respiratory protective devices: _____
 - Safety harness and/or safety line or lifeline/rescue line: _____
 - Eye protectors: _____
 - Hand protection: _____
 - Safety boots: _____
 - Protective clothing: _____
 - Hearing protectors: _____
 - Safety helmets: _____
 - Other: _____

8. SIGN IN PERMIT

The above conditions have been advised to me and are clearly understood. It is agreed all conditions of this permit system will be undertaken (as required).

Responsible Person Signature: _____
 Permit Open (Time): _____
 Master/Chief Engineer/Mate: _____
 Date: 25-04-07

9. WORK COMPLETED/SUSPENDED

All person have been withdrawn, the work has been suspended or completed. The workplace covered by this permit has been left in a safe condition.

- List continuing deficiencies: _____

10. SIGN OUT PERMIT

Responsible Person Signature: _____
 Permit Close (Time): _____
 All personnel have exited confined space/s, ceased all hot work and equipment is safe to be used or has been tagged out and no personnel are working aloft, overboard.
 Master/Chief Engineer/Mate: _____
 Date: 25-04-07

Permit No: 4271

Tag No: _____

 Contractors name: P+O
 Responsible person: Sean Connolly
Rogers

2. DESCRIPTION OF WORK TO BE UNDERTAKEN

3. CONFINED SPACE

The items ticked below have been isolated or made safe:

- Pipelines (water, steam, gas, etc)
- Mechanical/electrical drives
- Sludges/deposits/waste
- Harmful materials
- Electrical services
- Warning notices, locks, or tags have been fitted to means of isolation
- Radiation services

a) PURGING AND VENTILATION

Purging and ventilation measures listed below have been implemented:

- Purging of space
- Ventilation of space
- Continuous ventilation of space required

b) ATMOSPHERIC TEST REQUIREMENT

The test equipment has been calibrated and the atmosphere has been tested for: (N) in details and results of the tests)

- Safe oxygen level: 20.9
 Testing time: 0730 Date: 25.04.07
- Atmosphere contaminant(s) (list contaminants, concentrations and compare with exposure standards):

Testing time: _____ Date: _____

- Flammable atmosphere (give % LEL)
 Testing time: _____ Date: _____
- Continuous monitoring for atmosphere contaminants required
- Continuous monitoring flammable gas detector

The atmosphere is safe for entry under the conditions ticked below:

- With a supplied-air respiratory protective device.
- With an air purifying (non air-supplied) respiratory protective device.
- Without a respiratory protective device.

4. HOT WORK

Communications arrangements: _____

Rescue and emergency procedures are understood and have been posted.

c) OTHER CONTROL MEASURES

Smoking is banned in the confined space and adjoining area. Measure ticked below have been implemented:

- Warning notices/barricades are in position.
- Special precautions (ie vessel's/contractors equipment) _____

Part requirements complied with.

d) PERSONAL PROTECTIVE EQUIPMENT

The personal protective equipment ticked below shall be worn, (specify details where appropriate):

- Supplied-air respirators: _____
- Air purifying respiratory protective devices: _____
- Safety harness and/or safety line or lifeline/rescue line: _____
- Eye protectors: _____
- Hand protection: _____
- Safety boots: _____
- Protective clothing: _____
- Hearing protectors: _____
- Safety helmets: _____
- Other: _____

8. SIGN IN PERMIT

The above conditions have been advised to me and I clearly understand. It is agreed all conditions of this permit system will be undertaken (as required).

Responsible Person Signature: _____

Permit Open (Time): 0700 hrs

Master/Chief-Engineer/Mate: J. Davy

Date: 26.4.07

9. WORK COMPLETED/SUSPENDED

All person have been withdrawn, the work has been suspended or completed. The workplace covered by this permit has been left in a safe condition.

List continuing deficiencies: _____

10. SIGN OUT PERMIT

Responsible Person Signature: _____

Permit Close (Time): _____

All personnel have exited confined space/s, ceased all hot work and equipment is safe to be used or has been tagged out and no personnel are working aloft, overboard.

Master/Chief Engineer/Mate: _____

Date: 26.04.07

ZONE 10

Permit No: 4277

Tag No: _____

P&O Maritime Services

Vessel Permit to Work

Distribution
 White: Original person seeking permit
 Pink: Retain on bridge
 Yellow: Chief Engineer/Control Room
 Blue: Master copy book

1. DETAILS

Vessel's name: S/S SURUCARA
 Work requested by: P.P.O.
 Location of work on vessel: 2nd Deck
 Date: 26.4.07
 Outside contractors
 Company: TAVICOR
 Contractors name: RUSSELL BROWN + PARTNERS
 Responsible person: BEV

2. DESCRIPTION OF WORK TO BE UNDERTAKEN

1st WATER SYSTEM
No 2 GENERATOR

3. CONFINED SPACE

The items ticked below have been isolated or made safe:

- Pipelines (water, steam, gas, etc)
 Mechanical/electrical drives
 Sludges/deposits/waste
 Harmful materials
 Electrical services
 Warning notices, locks, or tags have been fitted to means of isolation
 Radiation services

a) PURGING AND VENTILATION

Purging and ventilation measures listed below have been implemented:

- Purging of space
 Ventilation of space
 Continuous ventilation of space required

b) ATMOSPHERIC TEST REQUIREMENT

The test equipment has been calibrated and the atmosphere has been tested for: (fill in details and results of the tests)

- Safe oxygen level: _____
 Testing time: _____ Date: _____

- Atmosphere contaminant(s) (list contaminants, concentrations and compare with exposure standards): _____

 Testing time: _____ Date: _____

- Flammable atmosphere (give % LEL)
 Testing time: _____ Date: _____

- Continuous monitoring for atmosphere contaminants required
 Continuous monitoring flammable gas detector

The atmosphere is safe for entry under the conditions ticked below:

- With a supplied-air respiratory protective device.
 With an air purifying (non air-supplied) respiratory protective device.
 Without a respiratory protective device.

4. HOT WORK

The precautions ticked below must be observed:

- Area clean and free of all readily combustible materials.
 A water hose run to job site and tested.
 Welding machine earthed directly to equipment being welded as close to the welding point as possible.
 Power leads not draped across pipelines or access ways.
 Electrical trace on pipes located. Hot work is/ is not permissible inside this space.
 Coatings stripped to minimise fire risks.
 Need for firewatcher.
 Portable fire extinguisher at hand.
 Any J.S.A. identified and observed.
 Adjacent spaces checked.
 Isolate fire zones (if applicable).
 Greater than 500 meters from Platform.

5. MECHANICAL/ELECTRICAL ISOLATION

- Tag System used.
 J.S.A. followed (if applicable).
 Other personnel verbally advised.
 Other hazards identified and isolated.
 All moving machinery close to work area shut down or safeguarded.
 Isolation switches etc. engaged.

6. WORKING ALOFT/OVERBOARD

- Harness supplied and safe to use.
 Any electrical or other hazards identified.
 Portable power leads/equipment safe to use.
 Isolate and tag radar/satellite communications.
 J.S.A. adhered to (if applicable).

7. GENERAL REQUIREMENTS**a) USE OF CHEMICAL AGENTS (Details to be completed)**

No chemical agents other than those listed below may be taken into the confined space:

b) STAND-BY PERSONNEL AND RESCUE ARRANGEMENTS

The following arrangements have been made:

- Stand-by person(s) are (identify): _____
 Alternative to stand-by (specify arrangements): _____
 Communications arrangements: _____
 Rescue and emergency procedures are understood and have been posted.

c) OTHER CONTROL MEASURES

Smoking is banned in the confined space and adjoining area. Measures ticked below have been implemented:

- Warning notices/baricades are in position.
 Special precautions (ie vessels/contractors equipment) _____
 Port requirements complied with.

d) PERSONAL PROTECTIVE EQUIPMENT

The personal protective equipment ticked below shall be worn, (specify details where appropriate):

- Supplied-air respirators: _____
 Air purifying respiratory protective devices: _____
 Safety harness and/or safety line or lifeline/rescue line: _____
 Eye protectors: _____
 Hand protection: _____
 Safety boots: _____
 Protective clothing: _____
 Hearing protectors: _____
 Safety helmets: _____
 Other: _____

- Harmful materials
- Electrical services
- Warning notices, locks, or tags have been fitted to means of isolation
- Radiation services

a) PURGING AND VENTILATION

Purging and ventilation measures listed below have been implemented:

- Purging of space
- Ventilation of space
- Continuous ventilation of space required

b) ATMOSPHERIC TEST REQUIREMENT

The test equipment has been calibrated and the atmosphere has been tested for: (Nil in details and results of the tests)

- Safe oxygen level: _____
 Testing time: _____ Date: _____

- Atmosphere contaminant(s) (list contaminants, concentrations and compare with exposure standards): _____
 Testing time: _____ Date: _____

- Flammable atmosphere (give % LEL)
 Testing time: _____ Date: _____

- Continuous monitoring for atmosphere contaminants required
- Continuous monitoring flammable gas detector

The atmosphere is safe for entry under the conditions ticked below:

- With a supplied-air respiratory protective device.
- With an air purifying (non air-supplied) respiratory protective device.
- Without a respiratory protective device.

4. HOT WORK

The precautions ticked below must be observed:

- Area clean and free of all readily combustible materials.
- A water hose run to job site and tested.
- Welding machine earthed directly to equipment being welded as close to the welding point as possible.
- Power leads not draped across pipelines or access ways.
- Electrical trace on pipes located. Hot work is/ is not permissible inside this space.
- Coatings stripped to minimise fire risks.
- Need for firewatcher.
- Portable fire extinguisher at hand.
- Any J.S.A. identified and observed.
- Adjacent spaces checked.
- Isolate fire zones (if applicable).
- Greater than 500 meters from Platform.

5. MECHANICAL/ELECTRICAL ISOLATION

- Tag System used.
- J.S.A. followed (if applicable).
- Other personnel verbally advised.
- Other hazards identified and isolated.
- All moving machinery close to work area shut down or safeguarded.
- Isolation switches etc. engaged.

6. WORKING ALOFT/OVERBOARD

- Harness supplied and safe to use.
- Any electrical or other hazards identified.
- Portable power leads/equipment safe to use.
- Isolate and tag radar/satellite communications.
- J.S.A. adhered to (if applicable).

7. GENERAL REQUIREMENTS

a) USE OF CHEMICAL AGENTS (Details to be completed)

No chemical agents other than those listed below may be taken into the confined space: _____

b) STAND-BY PERSONNEL AND RESCUE ARRANGEMENTS

The following arrangements have been made:

- Stand-by person(s) are (identify): _____
- Alternative to stand-by (specify arrangements): _____
- Communications arrangements: _____
- Rescue and emergency procedures are understood and have been posted.

c) OTHER CONTROL MEASURES

Smoking is banned in the confined space and adjoining area. Measure ticked below have been implemented:

- Warning notices/barricades are in position.
- Special precautions (ie vessel's/contractors equipment) _____
- Port requirements complied with.

d) PERSONAL PROTECTIVE EQUIPMENT

The personal protective equipment ticked below shall be worn, (specify details where appropriate):

- Supplied-air respirators: _____
- Air purifying respiratory protective devices: _____
- Safety harness and/or safety line or lifeline/rescue line: _____
- Eye protectors: _____
- Hand protection: _____
- Safety boots: _____
- Protective clothing: _____
- Hearing protectors: _____
- Safety helmets: _____
- Other: _____

8. SIGN IN PERMIT

The above conditions have been advised to me and are clearly understood. It is agreed all conditions of this permit system will be undertaken (as required).

Responsible Person Signature: Ben Muller

Permit Open (Time): 0845

Master/Chief Engineer/Mate: R.D

Date: 26-04-07

9. WORK COMPLETED/SUSPENDED

All person have been withdrawn, the work has been suspended or completed. The workplace covered by this permit has been left in a safe condition.

- List continuing deficiencies:

10. SIGN OUT PERMIT

Responsible Person Signature: Ben Muller

Permit Close (Time): 1645

All personnel have exited confined spaces, ceased all hot work and equipment is safe to be used or has been tagged out and no personnel are working aloft, overboard.

Master/Chief Engineer/Mate: ABO7

Date: 26-4-07

Permit No: 4284

Tag No: _____

 Portable power leads/equipment safe to use.
 Isolate and tag radar/satellite communications.
 J.S.A. adhered to (if applicable).

7. GENERAL REQUIREMENTS**a) USE OF CHEMICAL AGENTS (Details to be completed)**

No chemical agents other than those listed below may be taken into the confined space: _____

b) STAND-BY PERSONNEL AND RESCUE ARRANGEMENTS

The following arrangements have been made:

- Stand-by person(s) are (identify): _____
 Alternative to stand-by (specify arrangements): _____
 Communications arrangements: _____
 Rescue and emergency procedures are understood and have been posted.

c) OTHER CONTROL MEASURES

Smoking is banned in the confined space and adjoining areas. Measure ticked below have been implemented:

- Warning notices/barricades are in position.
 Special precautions (ie vessels/contractors equipment) _____
 Port requirements complied with.

d) PERSONAL PROTECTIVE EQUIPMENT

The personal protective equipment ticked below shall be worn, (specify details where appropriate):

- Supplied-air respirators: _____
 Air purifying respiratory protective devices: _____
 Safety harness and/or safety line or lifeline/rescue line: _____
 Eye protectors: _____
 Hand protection: _____
 Safety boots: _____
 Protective clothing: _____
 Hearing protectors: _____
 Safety helmets: _____
 Other: _____

8. SIGN IN PERMIT

The above conditions have been advised to me and are clearly understood. It is agreed all conditions of this permit system will be undertaken (as required).

Responsible Person Signature: midon

Permit Open (Time): 1550

Master/Chief Engineer/Mate: RWS

Date: 26-06-07

9. WORK COMPLETED/SUSPENDED

All persons have been withdrawn, the work has been suspended or completed. The workplace covered by this permit has been left in a safe condition.

- List continuing deficiencies:

10. SIGN OUT PERMIT

Responsible Person Signature: midon

Permit Close (Time): 0150

All personnel have exited confined spaces, ceased all hot work and equipment is safe to be used or has been tagged out and no personnel are working aloft, overboard.

Master/Chief Engineer/Mate: midon

Date: 26-06-07 27-06-07

Permit No: 4290

Tag No: _____

P&O Maritime Services

Vessel Permit to Work

Distribution
White: Original person seeking permit
Pink: Retain on bridge
Yellow: Chief Engineer/Control Room
Blue: Master copy book

1. DETAILS

Vessel's name: SSV P+D
 Work requested by: A/K Flt
 Location of work on vessel: 27-04-07
 Date: _____
 Outside contractors
 Company: K&C
 Contractors name: Bob Burger
 Responsible person: Alan Capel

2. DESCRIPTION OF WORK TO BE UNDERTAKEN

A/K Installation
Hot Work

3. CONFINED SPACE

- The items ticked below have been isolated or made safe:
- Pipelines (water, steam, gas, etc)
 - Mechanical/electrical drives
 - Sludges/deposits/waste
 - Harmful materials
 - Electrical services
 - Warning notices, locks, or tags have been fitted to means of isolation
 - Radiation services

a) PURGING AND VENTILATION

- Purging and ventilation measures listed below have been implemented:
- Purging of space
 - Ventilation of space
 - Continuous ventilation of space required

b) ATMOSPHERIC TEST REQUIREMENT

- The test equipment has been calibrated and the atmosphere has been tested for: (Nil in details and results of the tests)
- Safe oxygen level:
 Testing time: _____ Date: _____
 - Atmosphere contaminant(s) (list contaminants, concentrations and compare with exposure standards):
 Testing time: _____ Date: _____
 - Flammable atmosphere (give % LEL)
 Testing time: _____ Date: _____
 - Continuous monitoring for atmosphere contaminants required
 - Continuous monitoring flammable gas detector
- The atmosphere is safe for entry under the conditions ticked below:
- With a supplied-air respiratory protective device.
 - With an air purifying (non air-supplied) respiratory protective device.
 - Without a respiratory protective device.

4. HOT WORK

- The precautions ticked below must be observed:
- Area clean and free of all readily combustible materials.
 - A water hose run to job site and tested.
 - Welding machine earthed directly to equipment being welded as close to the welding point as possible.
 - Power leads not draped across pipelines or access ways.
 - Electrical trace on pipes located. Hot work is/ is not permissible inside this space.
 - Coatings stripped to minimise fire risks.
 - Need for firewatcher.
 - Portable fire extinguisher at hand.
 - Any J.S.A. identified and observed.
 - Adjacent spaces checked.
 - Isolate fire zones (if applicable).
 - Greater than 500 meters from Platform.
- Zone 4

5. MECHANICAL/ELECTRICAL ISOLATION

- Tag System used.
- J.S.A. followed (if applicable).
- Other personnel verbally advised.
- Other hazards identified and isolated.
- All moving machinery close to work area shut down or safeguarded.
- Isolation switches etc. engaged.

6. WORKING ALOFT/OVERBOARD

- Harness supplied and safe to use.
- Any electrical or other hazards identified.
- Portable power leads/equipment safe to use.
- Isolate and tag radar/satellite communications.
- J.S.A. adhered to (if applicable).

7. GENERAL REQUIREMENTS

- a) USE OF CHEMICAL AGENTS** (Details to be completed)
