SENATE LEGISLATION COMMITTEE - QUESTIONS ON NOTICE 2005-2006 SUPPLEMENTARY ESTIMATES HEARING

Outcome: 1

Output Group: 1.4: Assistance for Transition Through and From School

DEST Question No. E826_06 - Final

Senator Wong provided in writing.

Question:

Please provide a list of how much funding has been provided in total for each local service area under the Australian Network of Industry Careers Advisers? What methodology was used to determine how funding for each program was allocated under the initiative?

Answer:

Australian Network of Industry Careers Advisers

The Australian Network of Industry Career Advisers (ANICA) initiative includes two programme elements that service regional areas across Australia – the Local Community Partnerships (LCPs), and the Regional Industry Career Advisers (RICAs), as well as other initiatives that seek to improve the professional standards for, and status of, career advisers.

(a) Local Community Partnerships

To achieve national coverage, 213 Local Community Partnerships (LCP) Service Regions have been established for implementation of the three LCP career and transition programmes.

The Request for Funding Applications for the Local Community Partnerships was released on 6 July 2005, and closed on 1 September 2005. Contract offers to preferred providers were made in November and December 2005. Funding allocations for each LCP region was included in the Request for Funding documentation and is included at Attachment A.

The geographic region for an LCP Service Region is the Australian Bureau of Statistics defined Statistical Sub Division (SSD). The SSD level is the smallest regional level for which important social and economic data is readily available from the Census and other sources. Data for youth, education, employment and population by SSD are obtained from the most recently available ABS Census of Population and Housing. The most recent data available at the time of establishing the LCP Service Regions is from the 2001 Census.

Basing LCP Service Regions on SSDs facilitates a more equitable funding framework for distribution of funds between LCPs, and enables transparency of the service regions.

Details of funding for each LCP Service Region can be found at http://www.dest.gov.au/sectors/career_development/programmes_funding/programme_categories/key_career_priorities/lcp/default.htm.

Geographic Location

Allowance has been made for the difficulties in servicing areas outside metropolitan Australia. Using the MCEETYA Schools Geographic Location Classification, regions have been classified as either, Metropolitan, Provincial Cities, Other Provincial Areas or Remote. Loadings to these regions reflect contributions towards the increased costs of travel, recruiting and retaining staff and other factors affected by distance and remoteness.

(b) Regional Industry Career Advisers

The Regional Industry Career Adviser (RICA) Network have been established in 57 regions nationally. The RICA Service Regions are based on aggregations of the LCP Service Regions. Each services on average four LCPs. Funding of around \$6 million annually will support the role of RICAs.

The Request for Tender for the Regional Industry Career Advisers was released on 6 July 2005, and applications closed on 4 August 2005. The Department is currently undertaking contract negotiations with preferred tenderers.

We are unable to provide you with a breakdown of funding for each of the 57 RICA Service Regions as contract negotiations have yet to be finalised.

(c) Funding Methodology

The ANICA initiative comprises three elements:

1. Expanding the role of Local Community Partnerships (LCPs) to include the delivery of the:
 - Career and Transition Support (CTS) Programme; and
 - Adopt a School Programme (ASP).

Funding of some \$22 million each year is being provided to LCPs to ensure young people have an understanding of the career choices available to them. The LCP network will also receive around \$4.6 million annually to deliver 'Adopt a School' projects that promote greater local business involvement in school learning programmes.

Resources provided for the LCP career and transition programme are allocated to LCP Service Regions based on numbers of schools in each region as schools are the primary and constant unit for LCP activity.

Costings were based on the experience gained from the Career and Transition Pilot projects.

2. Extending industry leadership through the establishment of an industry-led network, the Regional Industry Career Advisers (RICAs). Funding of some \$6 million annually will support the network of RICAs. Estimates for the RICA Network were based on one full time equivalent RICA personnel for each Service Region with administration support.
3. Improving the standards for, and status of, career advisers through:
 - expansion of professional development opportunities for career advisers;
 - provision of scholarships for career advisers to undertake study and industry placements;
 - School and Industry Leaders Forums; and
 - Career Education Lighthouse Schools projects.

The elements outlined above have previously been trialled and funding of \$2 million has been provided each year to continue them.

State	LCP Service Region Number	LCP Service Region Name	TOTAL SWL Funding (GST exclusive) 2006-2008	TOTAL CTS Funding (GST exclusive) 2006-2008	TOTAL ASP Funding (GST exclusive) 2006-2008
