Question

When are enrolment statistics available to the Department? Please provide a copy of the statistics as soon as they are available.

Answer

International student enrolments data is collated from information supplied by education institutions. Australian Education International (AEI) uses this data to produce a suite of monthly reports and tables showing up-to-date trends in international student education in Australia. These reports are published on the AEI website within 6 weeks of the end of each reference month. See:
