

Attachment A

Peter Macintosh, MBBS, FRANZCR, DDU, FLEX *

After obtaining the RANZCR (Royal Australian and New Zealand College of Radiologists) Fellowship in 1976, Peter worked in the USA as Assistant Professor of Radiology, University of Rochester, New York. On returning to Sydney in 1979 he worked for 6 years as a staff specialist at Royal Prince Alfred Hospital and Royal North Shore Hospital. Over the years he enjoyed many Visiting Professorship appointments, delivering multiple presentations, participated in many grant applications, and published extensively.

In 1984 Peter entered private practice and by the mid 1990s had helped create and grow the Pittwater Radiology Group from 6 to over 40 radiologists and become its Executive Chairman. The Group continued to build via mergers and acquisitions across most of the states, and by 2000 was successfully floated as the Medical Imaging Australia (MIA) Group. Peter went on to become the first Chief Executive Officer and Managing Director of MIA Group and over the next 3 years saw the company more than double its size by further growth in Australia and the United Kingdom.

In 2003 he resigned from MIA Group to pursue personal interests and return to clinical radiology. At this time he developed a keen interest in teleradiology and developed a special purpose company, Digital Health Screening, to provide high quality service and fast response reporting capabilities to regional hospitals. Peter has since been reporting for hospitals in Queensland, South Australia, the Northern Territory and our Health Services Australia site in Perth.

Peter is currently the principal of Digital Health Screening and continues to work as a practising clinical radiologist.

* MBBS (Bachelor of Medicine/Bachelor of Surgery)
FRANZCR (Fellow of the Royal Australian and New Zealand College of Radiologists)
DDU (Diploma of Diagnostic Ultrasound)
FLEX (Federal Licensing Examination)
