

SENATE STANDING COMMITTEE ON LEGAL AND CONSTITUTIONAL AFFAIRS
AUSTRALIAN CUSTOMS SERVICE

Question No. 99

Senator Ludwig asked the following question at the hearing on 13 February 2007:

Are any risk profiles still turned off?

The answer to the honourable senator's question is as follows:

All risk profiles that had been deactivated and were subsequently identified as being required for risk management and border protection were reactivated in ICS by 3 November 2005. Not all active profiles at cutover were reactivated as the profile population is dynamic. Profiles are reassessed, amended or removed on a regular basis to align with current risk indicators.
