2) John Edwards call re blasting, record of conversations below

Wednesday 09:30 I returned John Edwards call (voice mail) from previous day at 09:30 and he wanted to know why he had not been told that blasting was to happen at site on Sunday and Monday and why had not been told that power would be cut off for 4.5 hours Monday ? Told him I would investigate with NatO Infrastructure and get back to him.

Called JE at 09:55 and told him that our Infrastructure team was not aware of any blasting and that they would contact GHD and get advice from them for me to pass on to him. Advised him that we don't have power to the site and that he should check with Western Power as to what had happened.
