

Note: Community Liaison Officer

Called Cathy, fairly calm chat about kangaroo signs, no site wide PA. C said "blasting" was still going on, told her only evap pond now but some small ad hoc chemical rock breaking will happen. She said they had a muddy deluge after heavy rain on 6 Dec 2012. No other major issues except that they don't want centre built. Said she should call me if any issues arise, otherwise I will call her in a week or 2. Asked me to seek statement in writing that centre is for 600 clients. I offered to discuss size of centre with her sources but she declined, I said they were probably rumours feeding on each other and going round in circles. C said she would still like a written statement of centre capacity."
